Providence, RI 02903

1       10 MAY 2018 -- 10:00 A.M.

2                     THE COURT: Good morning, everyone. We're here  
3       in the matter of Markham Concepts, Inc. v. Hasbro,  
4       Inc., et al, and we're here for closing arguments on  
5       the bench trial in this matter. Let's have counsel  
6       identify themselves for the record, and let's begin  
7       with the Plaintiffs.

8                     MR. POLLARO: Robert Pollaro, Cadwalader  
9       Wickersham & Taft, here for the Markham parties.

10                  MR. MOEHRINGER: John Moehringer, Cadwalader,  
11       Wickersham & Taft, Markham parties.

12                  MR. COLE: Good morning, your Honor. David  
13       Cole, Cadwalader, Wickersham & Taft, here on behalf of  
14       the Markham parties.

15                  MS. DUNN: Good morning, your Honor. Mary Dunn,  
16       local counsel on behalf of the Markham parties.

17                  MR. KRUMHOLZ: Good morning, your Honor. Josh  
18       Krumholz from Holland & Knight on behalf of Hasbro.

19                  MS. BATLINGER: Good morning, your Honor.  
20       Courtney Batliner from Holland & Knight on behalf of  
21       Hasbro.

22                  MS. GLASER: Good morning, your Honor. Patricia  
23       Glaser for Ruben Klamer.

24                  MS. VAN LOON: Good morning, your Honor.  
25       Erica van Loon from Glaser Weil for Mr. Klamer.

1                   MR. RENNER: Good morning, your Honor. Eric  
2 Renner for Mr. Klammer.

3                   MR. JINKINS: Good morning, your honor.  
4 David Jinkins on behalf of Linkletter and Atkins.

5                   MS. BUSH: Good morning, your Honor. Christine  
6 Bush on behalf of the Atkins and the Linkletter  
7 Defendants.

8                   MR. TURNER: Robert Turner on behalf of Hasbro,  
9 your Honor.

10                  MS. FRAMROZE: Camille Framroze on behalf of  
11 Hasbro.

12                  MR. GORACKE: And Mark Goracke on behalf of  
13 Hasbro.

14                  THE COURT: Very good. Thank you all very much.

15                  All right. So we have a lot to cover and a lot  
16 of folks who want to argue. I think there was an  
17 exchange of some e-mails about argument. Frankly I  
18 can't remember exactly what I said; I'm sure I gave you  
19 plenty of time, but so I think Plaintiffs will go  
20 first. And how much time did I give you?

21                  MR. POLLARO: An hour-and-a-half.

22                  THE COURT: Total, right?

23                  MR. POLLARO: No. Two hours total. I think an  
24 hour-and-a-half initially.

25                  THE COURT: You don't need to use it all, all

1 right?

2 MR. POLLARO: I appreciate that.

3 THE COURT: Okay.

4 All right. And you all are going to divide  
5 something like that among yourselves; right?

6 MR. KRUMHOLZ: Yes. What you said specifically  
7 or what Mr. Jackson said was an hour-and-a-half, and we  
8 would do an hour before lunch, we'd have a lunch break,  
9 we'd have another half hour to an hour, and they would  
10 have rebuttal up to a half hour.

11 THE COURT: All right. Well, let's try to keep  
12 it as concise as possible, okay?

13 All right. Mr. Pollaro.

14 MR. POLLARO: Thank you, your Honor. I have  
15 copies of the presentation for the Court.

16 THE COURT: Okay.

17 MR. POLLARO: May I approach?

18 THE COURT: You may.

19 (Pause)

20 THE COURT: I just want to take a moment so you  
21 all know we have a visitor today, Judge Paul Howard,  
22 who is sitting over there in the jury box. He's a  
23 federal district court judge in Australia, and he's  
24 visiting the United States for a period of about six  
25 months, was it?

1                   JUDGE HOWARD: Three months.

2                   THE COURT: Three months, working down at the  
3                   federal judicial center in Washington and preparing  
4                   some reports and recommendations regarding how the  
5                   federal judiciary in Australia can work more  
6                   effectively with its executive and legislative  
7                   branches, and he's visiting us here in Rhode Island for  
8                   a couple of days doing a variety of things, and we  
9                   thought this would be a nice thing for him to observe.  
10                  He's read your briefs, and he may have questions; who  
11                  knows.

12                  JUDGE HOWARD: Thank you.

13                  THE COURT: So go ahead.

14                  MR. POLLARO: Thank you, your Honor.

15                  May it please the Court, the operative facts and  
16                  events in this case occurred nearly 60 years ago, yet  
17                  the record from that era remains largely intact, and  
18                  that record uniformly identifies Bill Markham as the  
19                  creator of the Game. To believe the evolving stories  
20                  told by the Defendants at trial requires this Court to  
21                  ignore the contemporaneous written record as well as  
22                  the prior conduct of all the relevant participants in  
23                  favor of these newfound revelations of three  
24                  coordinated witnesses. In effect, what this case boils  
25                  down to is what is more trustworthy: The written and

1       contemporaneous claims of the parties, or 60-year-old  
2       mustered recollections understandably schooled for the  
3       trial.

4                  The Markham parties respectfully submit that the  
5       evidence shows that Bill Markham is the author of the  
6       Game, the work was not a work-for-hire, and that the  
7       Markham parties have established their entitlement to  
8       the right of termination to be exercised at their  
9       discretion.

10                 The two most percipient witnesses in this case  
11      left no doubt about their representative understandings  
12      and intentions in this case, no doubt at all. In 1965  
13      Ruben Klamer was erroneously identified as having  
14      designed The Game of Life in an industry periodical.

15                 And your Honor, I believe I did not give you the  
16      exhibit binder that I have for you as well.

17                 THE COURT: Okay. Pass it up if you have it.

18                 (Pause)

19                 MR. POLLARO: May I approach, your Honor.

20                 THE COURT: Sure.

21                 MR. POLLARO: We have copies for Defendants as  
22      well.

23                 MR. KRUMHOLZ: Are these all admitted exhibits?

24                 MR. POLLARO: I believe these are all admitted,  
25      although you'll notice they don't all have JTX numbers.

1                   MR. KRUMHOLZ: Correct. Some were admitted that  
2 were not JTX.

3                   MR. POLLARO: Your Honor, rather than having  
4 everybody leaf through their giant binders, we tried  
5 our best to make it easier for everyone.

6                   THE COURT: Sure.

7                   MR. POLLARO: So if you turn to Tab 25, I was in  
8 the process of telling you about an exchange that  
9 happened in 1965. We refer to this as the 1965  
10 Exchange. And what happened in 1965 was very clear,  
11 and it's very important in this case because it is a  
12 snapshot of what the parties believed their  
13 representative roles and understandings were in this  
14 case. We don't have to go 58 years, 60 years and try  
15 to remember what happened. This is what happened.  
16 This is what the parties wrote clearly in the record,  
17 and this is what I would like to talk about.

18                  So in 1965 Klamer was erroneously identified as  
19 having designed The Game of Life in an industry  
20 periodical. So if you turn to Tab 25, Toy & Hobby  
21 World from 1965, and on the very last page you'll see  
22 the very small print -- and we highlighted it, tried to  
23 make it easier for everybody -- that Ruben Klamer was  
24 identified as having designed The Game of Life. That  
25 was published in 1965. That was a big deal because

1       when Markham saw that he was furious. He immediately  
2       wrote to Ruben Klamer and demanded that he retract the  
3       statement. And if you turn to Tab 24 you'll see the  
4       first letter that Bill Markham wrote to Ruben Klamer to  
5       that effect.

6           So upon seeing that Ruben Klamer was publicly  
7       declaring that he designed the Game, Bill Markham  
8       called him out. And what did Klamer do? He complied,  
9       and he informed the publication, quote, "Be sure any  
10      publicity concerning me in your publication or anywhere  
11      else does not refer to The Game of Life." He didn't  
12      describe what his role is or he didn't describe the --  
13      he said do not associate me with The Game of Life.  
14      That's what occurred in 1965.

15           Yet today, since Bill Markham has passed and  
16       he's not here to defend himself, we see examples like  
17       this. Copies of the game today bear the picture of  
18       Ruben Klamer on them, and what I'm holding right now,  
19       your Honor, is PTX270. And I'm happy to bring it up; I  
20       don't think there's any dispute that this game is in  
21       evidence. But it's a picture of Ruben Klamer and it's  
22       got a description of his contributions to the Game. In  
23       1965 this wouldn't have stood, and it shouldn't stand  
24       today, even though Bill Markham is not here.

25           So what he's done since, he's enlisted help to

1 help finish his quest of minimizing Bill Markham. And  
2 as we'll discuss today, the facts as they've existed  
3 for the past 58 years show otherwise, and this Court  
4 should now allow his legacy to be destroyed.

5 No issues -- we don't believe there's any real  
6 issues regarding the outstanding issues that this Court  
7 needs to be resolved (sic). We categorized them as  
8 authorship, work-for-hire, and derivatives. There's a  
9 couple of subcomponents of that, but we'll talk about  
10 that. We talked about this at the last, at the end of  
11 the last hearing. It appears that the parties are all  
12 in agreement that your decision here will not  
13 immediately impact the status quo.

14 Turning to authorship, there's no apparent  
15 dispute among the parties with respect to the  
16 applicable law. The parties agree that the author is a  
17 person that creates --

18 THE COURT: I'm not sure I understand that last  
19 statement you made when you say my decision won't  
20 immediately impact the status quo. Could you --  
21 exactly what do you mean?

22 MR. POLLARO: What I mean by that is Hasbro will  
23 continue to sell the game and the royalties will still  
24 continue to be paid, and basically your decision will  
25 impact the -- basically, you know, we view it as

1 leveling the playing field or rebalancing the  
2 negotiation decisions of the parties.

3 THE COURT: You mean it won't influence the  
4 status quo in terms of the ability to market the Game?  
5 Is that what you're saying?

6 MR. POLLARO: That is what I'm saying, because  
7 what we're talking about here is the right to  
8 prospectively seek termination. So your decision  
9 today -- and again, Defendants may have a slightly  
10 different take, but based on what we talked about last  
11 time at the hearing --

12 THE COURT: Would you put the microphone just a  
13 little closer to you.

14 MR. POLLARO: Sure. My apologies.

15 THE COURT: So what you're saying is it affects  
16 the rights, but nobody -- until somebody, assuming you  
17 win, until there's an exercise of that right to  
18 terminate the status quo is not affected. Is that what  
19 you're saying?

20 MR. POLLARO: That's exactly what I'm saying.

21 THE COURT: Okay.

22 MR. POLLARO: And again, that's how I  
23 interpreted what the Defendants said at the end of the  
24 last hearing, and we agree with that; and so to the  
25 extent they have any disagreement with that I'm sure

1       they'll let you know that.

2           THE COURT: All right.

3           MR. POLLARO: So turning to authorship. Again,  
4       no real dispute about what the law is here. It's  
5       pretty black letter law. The parties agree that the  
6       author has to be the person that actually creates in a  
7       tangible medium of expression the work at issue. The  
8       parties also agree that copyrights do not under any  
9       circumstances extend to ideas or concepts. As you  
10      would guess, the application of those seemingly  
11      straightforward requirements has led to significant  
12      dispute amongst the parties, and that's what we're here  
13      to talk about.

14           So where do we begin? So typically, in your  
15      typical situation the authorship analysis begins  
16      directly with, well, it's written on the registrations  
17      themselves. However, in this case all the parties  
18      agree that the registrations were wrong, and I cited  
19      portions of the brief there.

20           The registrations identify Milton Bradley as the  
21      claimant. They can't be the claimant. They have a  
22      license. So we know that's wrong. They've been  
23      identified as the author. We believe that's wrong  
24      because Bill Markham should be there.

25           And you can see there we know the registration

1       is wrong because Bill Markham had assigned his rights  
2       to Link, and Link should have been identified as the  
3       claimant. So where does that leave us? And your  
4       Honor, quite frankly, based on the cases, that happens  
5       fairly regularly.

6                  THE COURT: That happens what?

7                  MR. POLLARO: Fairly regularly. It's not an  
8       uncommon occurrence that the registrations are in fact  
9       incorrect.

10                 THE COURT: So does it have any bearing? If  
11       both parties believe that the actual registration of  
12       the copyright is incorrect, I mean it seems like kind  
13       of an odd situation to me, frankly. There's no -- the  
14       original, it doesn't appear that the original was  
15       deposited with the copyright office. I think we agree  
16       on that; right?

17                 MR. POLLARO: That's correct.

18                 THE COURT: Or nobody can find it.

19                 MR. POLLARO: Right. It was, but it was lost,  
20       which again is not an uncommon occurrence.

21                 THE COURT: All right. So it's lost. If it was  
22       deposited, it was lost.

23                 MR. POLLARO: Yes.

24                 THE COURT: If it was deposited, it was  
25       deposited by Milton Bradley; is that right?

1                   MR. POLLARO: That is correct. The publisher.

2                   THE COURT: And the registration is to Milton  
3                   Bradley.

4                   MR. POLLARO: They filed the registration.

5                   Again, you know, there was some testimony about this,  
6                   which is the common practice, because under the  
7                   1909 Act the publisher, you couldn't get copyrights  
8                   under the old 1909 Act until the work was published.

9                   So I think everybody knows today, you know, as soon as  
10                  you create a work, if you create a work or if I create  
11                  a work it's copyrighted and we have rights  
12                  automatically. That wasn't the case under the  
13                  1909 Act. There was some small exceptions for  
14                  performances and things like that, but that's not what  
15                  we're talking about.

16                  So under the 1909 Act you had to publish, the  
17                  publisher had to publish the work and then seek  
18                  registration. And that's why all those cases from the  
19                  1909 Act, the *Kirby* cases, all those cases, the  
20                  publishers were the ones filing the work because  
21                  they're in charge of the publication and they have the  
22                  resources and things like that. So, you know, in  
23                  99 percent of these case it's the publisher that's  
24                  filing the registration.

25                  THE COURT: So it's Milton Bradley that then

1 publishes the work when they market the game, then they  
2 register it, and it remains registered in Milton  
3 Bradley until today; right?

4 MR. POLLARO: There were renewals in 1988, or  
5 '88 or '89. I think it was --

6 THE COURT: I mean it's Hasbro now, but --

7 MR. POLLARO: Yes. And the registrations, quite  
8 frankly, changed. It's interesting your Honor brings  
9 that up because the registrations changed from the 1960  
10 registrations to the renewal registrations, which is  
11 also an oddity. Link's name is not mentioned anywhere  
12 on any of those registrations in the renewals, so  
13 something changed that we don't know about.

14 THE COURT: Okay.

15 MR. POLLARO: You know, maybe they got --. But  
16 back to your Honor's question, which is a good one,  
17 does it matter? The short answer is no. In the  
18 situation where the registrations are challenged or  
19 potentially correct, all that does is give you the  
20 starting point of where the analysis begins. In other  
21 words what the evidence, what -- you know, where you  
22 start the analysis. And so I think your question is  
23 also a good one because ultimately your Honor is going  
24 to determine who should be the author on these  
25 registrations. It doesn't mean these registrations get

1 refiled or anything like that. You basically stop with  
2 your decision, so there's nothing that needs to be  
3 corrected or fixed or anything like that. So clear as  
4 mud, your Honor?

5 THE COURT: It just seems odd to me that, you  
6 know, a lot of things seem odd to me about this, but it  
7 does seem strange that the registrations are with  
8 entities that everybody seems to agree are incorrect  
9 and that that has existed for 60 years.

10 MR. POLLARO: Exactly. You're absolutely right,  
11 and obviously, you know, we lay out in our briefs why  
12 we think that's the case. I mean we were cut out of  
13 the conversations, and had we been part of the  
14 conversation we believe it would be different.  
15 Obviously they disagree with that. But that is  
16 certainly an excellent observation.

17 THE COURT: So where you are is that whoever is  
18 the appropriate owner of the copyright is not, it  
19 wasn't Milton Bradley, they're a licensee, and you were  
20 taking off from there.

21 MR. POLLARO: Yes, your Honor. I was basically  
22 trying to level-set the Court on where we should start  
23 this analysis. But again, back to your question, we  
24 could start with the registrations and we can say it  
25 says Milton Bradley, but, you know, it wouldn't change

1       the result. Ultimately the result would be the same.  
2       The evidence shows that they are not the author and  
3       therefore we continue it and have the decision from  
4       your Honor who the author is.

5           So I thought I would start at the assignment,  
6       but I didn't want to just start at the assignment  
7       because we put that in our briefs, and so I wanted to  
8       give you a little more context about how that  
9       assignment came to be, what was happening, why was that  
10      assignment entered into. And so, you know, there were  
11      a lot of facts that weren't in dispute. You know,  
12      there's no dispute that Ruben Klamer contacted Bill  
13      Markham in the summer of 1959. No issues there.

14           There is a dispute about whether or not Bill  
15      Markham had an undeveloped game at the time. Again, it  
16      doesn't change the analysis. We believe it's evidence  
17      that it makes the story make much more sense. Bill  
18      Markham was working on it; that's how it was able to be  
19      completed so quickly, and that's why he believes in  
20      part why -- and then it's borne out in the documents --  
21      why like in the 1965 exchange why he is the inventor,  
22      the creator, the designer, and the developer of the  
23      Game.

24           THE COURT: Well, okay. So I thought this was  
25      actually a critical factual dispute from your client's

1 point of view because, if I understood it correctly,  
2 it's the so-called undeveloped game that gives rise to  
3 the spinner and to the circuitous path, and I thought  
4 your contention was that those were concepts that were  
5 in the undeveloped game.

6 MR. POLLARO: And they are, and that's spelled  
7 out in the Bill Markham deposition, but it is by no  
8 means critical. It is part of our story. It is just  
9 another piece of evidence in the last 58 years trying  
10 to go back -- if undeveloped, now we're going 60 years,  
11 we're going a little bit further back -- just evidence  
12 in the evidentiary record that Bill Markham is the one  
13 that does this.

14 THE COURT: Well, those are two things that, if  
15 they're true, make him an author at least of part of  
16 the game; right?

17 MR. POLLARO: Yes.

18 THE COURT: And then you contend there's more.  
19 You contend there's -- and I want you to explain this  
20 to me, something about the board, the bonding of the  
21 board or whatever it was.

22 MR. POLLARO: Absolutely. And I think those are  
23 excellent questions, your Honor. But ultimately our  
24 point is Bill Markham created this entire thing, and  
25 that's what the documents show, that's what the

1       testimony shows, that's what all the evidence up until  
2       probably about October 2017 when this new theory came  
3       into the case and --

4                  THE COURT: But the testimony of Israel and  
5       Chambers was pretty clear that it was those two that  
6       were doing all of the work on creating the buildings  
7       and the overpasses and designing the cover of the box  
8       and the sketches. I mean I'm sure you're going to  
9       touch on all this evidence, but -- and they were very  
10      clear that Markham was never really in the room other  
11      than occasionally. It was the three people that were  
12      in the room when all that creative work was being done  
13      were Israel, Chambers, and Klamer.

14                  MR. POLLARO: Exactly, your Honor, and, quite  
15      frankly, that is exactly it in a nutshell because that  
16      is completely 180-degrees different than the evidence  
17      up until this new defense in the case.

18                  And in fact, as your Honor is well aware, all  
19      three of those parties submitted declarations in this  
20      case, in this very case in December of 2015 and January  
21      of 2016, and none of them said that. In fact, Ruben  
22      Klamer in that declaration, and I can't remember if it  
23      was January 6, 2015 or '16, referred to it as the  
24      Markham prototype. I mean their story changed  
25      overnight. Leonard's and Grace's declaration in this

1 case said nothing that they testified to at trial.  
2 They said nothing at the deposition that I took of them  
3 in the summer of 2017. The story they told you was  
4 simply nowhere else. It's nothing but a story, and  
5 that's ultimately what I intend to talk about today.

6 THE COURT: Okay. Well, have at it. I'll try  
7 not to throw you off here. Go ahead, tell me why I  
8 shouldn't believe it, I guess.

9 MR. POLLARO: So there's no dispute that the  
10 Game was completed and shown to Milton Bradley at  
11 Chasen's restaurant in Hollywood, California, in the  
12 week of August 10th. Milton Bradley loved it. No  
13 issues there.

14 So this is where it gets interesting. So again,  
15 going back to kind of what I was attempting to do, I'm  
16 trying to give you some context about why this signed  
17 agreement happened. So they had the fancy dinner,  
18 lunch, whatever you call it. Milton Bradley said  
19 they'll take it. And what happens? Ruben Klamer takes  
20 the prototype and he immediately walks it over to his  
21 attorney, and the attorney writes a letter. We all  
22 know the letter. It says the Game is proper copyright  
23 subject matter. So we know that letter, that occurred  
24 on August 14th, 1959.

25 The problem is he didn't tell Bill Markham about

1       that. Bill Markham had no idea that his prototype had  
2       been determined to be copyrightable. So what happens  
3       next? Klamer sends the Game to Milton Bradley on  
4       August 19, 1959. We talked about that at length. That  
5       is the letter where Ruben Klamer misrepresented that he  
6       had an exclusive contract. I'm sure the Court is well  
7       aware of that. But with that letter were certain  
8       attachments, one of which was the Game and one of which  
9       was this opinion of counsel that showed that Bill  
10      Markham's prototype was copyrightable.

11           So again, all this is kind of happening fast,  
12       all really fast. Milton Bradley wants to come out with  
13       a game for their hundred year anniversary. So what  
14       happens? Unbeknownst to Markham, Ruben Klamer enters  
15       into a license agreement with Milton Bradley, and we've  
16       seen that. When Markham found out about this, he was  
17       livid. He was absolutely beside himself. And as  
18       evidenced in his deposition testimony from 1999, he  
19       almost walked away. He was going to take his game and  
20       walk away. And so what happened? And actually I don't  
21       believe that's in dispute because Ruben Klamer  
22       testified about that at trial as well.

23           So what happens? The parties negotiate the  
24       assignment agreement. They negotiate an assignment  
25       agreement. It goes back and forth. We know there were

1       multiple versions. It wasn't a take-it-or-leave-it, it  
2       wasn't anything like that. It went back and forth, and  
3       they negotiated the terms of this agreement.

4           And Klamer needed Markham's rights. There's no  
5       dispute there. Later, in the 1989 litigation, he  
6       describes Bill Markham's rights as imperative. So  
7       here's the agreement, and that is kind of the backdrop.  
8       That's where we are. And so this is the negotiated  
9       agreement that came up. So you've seen the language  
10      before, so I'm not going to focus on it. I'm not going  
11      to reread it for you. Obviously "At the request of  
12      Link" portion, we'll deal with that in the  
13      work-for-hire issue.

14           So there's no question that Ruben Klamer is  
15      saying here at my request Markham invented, designed,  
16      and developed the game. So Bill Markham invented,  
17      excuse me, designed, and developed the game. That's  
18      what this agreement said.

19           Now, with respect to all the intellectual  
20      property, you can see it there: Upon the request of  
21      Link, Markham will pursue any copyrights, any  
22      trademarks, any patent applications anywhere that he is  
23      entitled to as the inventor, designer, and developer.  
24      No question about who the designer and developer and  
25      inventor of this game is. And interestingly, at the

1 time this agreement was signed the Game was  
2 copyrightable, but Bill Markham didn't know it.

3 Now, while Klamer referred to Markham's rights  
4 as imperative, what's also important -- consistent with  
5 your questions before -- if he was in the room and he  
6 knew exactly what Leonard and Grace were working on, he  
7 would have sought their rights as well. He didn't. He  
8 sought Bill Markham's rights. And that's why this is a  
9 piece of evidence that as we'll go through this you'll  
10 see that this is just a story that came up in October  
11 of 2017 when they realized that their work-for-hire  
12 defenses were not working out so well.

13 THE COURT: Doesn't that assume that he has a  
14 fairly sophisticated understanding of copyright law  
15 when you say he would have, should have and would have  
16 sought the assignments from Chambers and Israel?

17 MR. POLLARO: I wouldn't say sophisticated.  
18 Obviously, you know, there's no secret Ruben Klamer has  
19 hired many lawyers throughout his time, and we'll talk  
20 about some of those that he hired subsequently. But  
21 given the fact that he had a conversation certainly  
22 with his patent attorney or copyright attorney or  
23 intellectual property attorney, whatever it is, you  
24 know, on August 14th, 1959, there's certainly a certain  
25 level of understanding that Mr. Klamer has. He

1       certainly knew enough to take it to an IP attorney in  
2       1959.

3           THE COURT: So is what you're arguing -- I just  
4       want to be clear about the point you're making here.  
5       Are you saying that because Klamer did not seek an  
6       assignment from Israel and Chambers in 1959, that that  
7       suggests, that implies that the testimony of Israel and  
8       Chambers in 2017 is incorrect?

9           MR. POLLARO: I am, your Honor.

10          THE COURT: And you're saying that's evidence of  
11       that fact because had it been -- if what Israel and  
12       Chambers said was actually true, Klamer would have  
13       sought an assignment from them; he would have known  
14       enough to do that?

15          MR. POLLARO: Absolutely. And your Honor, going  
16       back to your point, I want to reach on my desk real  
17       quick because I have a case directly on this point.

18          THE COURT: Sure.

19           (Pause)

20          MR. POLLARO: I am reading, your Honor, from the  
21       District Court opinion in *Picture Music*, it is  
22       314 F.Supp. 640, and I'm reading from page 653, and  
23       I'll just read it just because it goes exactly to the  
24       question you just asked, your Honor. "Both Disney and  
25       Berlin were sensitive and sophisticated on the need to

1 procure an assignment of copyright interest before  
2 proceeding with publication except where no factual  
3 situation existed for a claim of retained ownership or  
4 an interest therein, by a writer, adapter or arranger."

5 So, your Honor, he knew enough to get an  
6 assignment agreement from Bill Markham. If he was in  
7 the room over their shoulder after just having talked  
8 to his patent attorney, he would have done the same  
9 thing with Leonard and Grace.

10 THE COURT: Okay.

11 MR. POLLARO: Again, so just to kind of keep it  
12 in perspective, I'm going to march you through the  
13 58 years of the highlights of where their story falls  
14 apart, where their broad pronouncements have no support  
15 and are nothing but a story that was told by -- you  
16 know, I'm sure the Court is aware they're all  
17 represented by the same counsel and they've all been  
18 represented by the same counsel since 2015.

19 So we call these the "Credit Letters." Shortly  
20 before the assignment was signed, Link asked Milton  
21 Bradley to display the name of Markham on the box as  
22 the game's designer. So in other words Ruben Klamer  
23 sent a letter to Milton Bradley and said Hey, listen,  
24 can you put Bill Markham's name on the box.

25 Milton Bradley unfortunately had a company policy that

1       they couldn't do that, they said it was confusing so  
2       they didn't do that, but not because they didn't think  
3       Bill Markham was the designer. So, but I mention that  
4       again; another situation, Ruben Klamer purportedly in  
5       the room, one of the two most percipient witnesses in  
6       this case, didn't say can you put Bill Markham's,  
7       Leonard Israel's, and Grace Falco's name on the box.  
8       He said Bill Markham.

9                   So "Manufacturing Suggestions." Again, we  
10      talked about the importance. I mean the authorship,  
11      you have to create, you have to actually fix the work  
12      into a medium. So what happens here is Bill Markham is  
13      being asked to provide Milton Bradley -- Milton Bradley  
14      obviously, you know, there's no dispute; they liked the  
15      prototype, they loved it, they wanted to mass produce  
16      it. So in that process they reached out to, well, I'll  
17      save this for later, but they reach out to Klamer  
18      because Klamer had misrepresented that he had an  
19      exclusive contract with Bill Markham. He had expressly  
20      told Milton Bradley if you have any issues you contact  
21      me directly, do not contact Bill Markham; everything  
22      needs to go through Link. And we have that evidence in  
23      the record where that distance was being created over  
24      and over and over again.

25                   So what we see here is Markham was asked to

1       prepare suggestions for how the Game might be  
2 manufactured. Again, understand this is September now,  
3 1959, and things are happening quickly. Milton Bradley  
4 originally wanted the Game on the market by January.  
5 That obviously didn't happen. But things were  
6 happening quick, and so they said Bill, you made this  
7 game; what can you do for us? What can you help us out  
8 with?

9           And Bill being, you know -- and he testified to  
10 this in 1989 -- a genuine guy said, Listen, I don't  
11 understand their process. I can tell you what I did,  
12 and I can just tell you what I did; maybe it's helpful,  
13 maybe it's not, I have no idea. And so what he did is  
14 he put together an entire sheet, you know, a couple  
15 pages of manufacturing suggestions that went to  
16 Milton Bradley through Link, and they were step-by-step  
17 of what he did from all the way from plastics and how  
18 you can make these things efficiently, or how he made  
19 them efficiently, and the molding and things like that,  
20 all the -- as Mr. Orbanes testified, those are the  
21 things that the creators do. Finding is one of those  
22 things. That's what creators do. You need to  
23 understand how not only to create it and what to  
24 create, but how to put it all together.

25           And so ultimately to your question, your Honor,

1 you know, that's how we view the testimony that  
2 occurred in LA. It was nothing but the preliminary  
3 models, routine tasks that Bill Markham gave to these  
4 staff attorneys -- sorry -- staff artists. I'm around  
5 too many attorneys recently.

6 But there's no evidence that they did anything  
7 but routine. They submitted a declaration, and I would  
8 encourage the Court, if I can find the cite I'll  
9 provide it -- but the declarations that were provided  
10 by these very witnesses in this case before this  
11 defense came in are stark and they read nothing like  
12 this testimony. And so ultimately what you see is they  
13 were doing nothing but the routine tasks.

14 And I don't think I mentioned it, but the names  
15 Leonard Israel and Grace Falco do not appear anywhere,  
16 anywhere in the contemporaneous record. There was one  
17 passing reference to them on the invoice that says six  
18 weeks staff artists, is the only reference to these two  
19 individuals in the record. That's it. And you'll here  
20 later about the timing of the invoice. The invoice was  
21 October 12th. They haven't even established -- we  
22 haven't even seen any evidence at all that they worked  
23 on the actual prototype. There were copies made. They  
24 couldn't tell the Court, they couldn't tell us if they  
25 worked on the prototype or the copy because they didn't

1 know. They didn't know they were copies, they didn't  
2 know, so it's quite -- we have no idea, and it's  
3 speculation. And so what the documents show is Bill  
4 Markham did this.

5 So "Correspondence," I pulled these out, and  
6 again, I'm mindful of the Court's time so there are  
7 remarkably a lot of documents that exist from this time  
8 frame, but I'm pulling out the ones that I think  
9 encapsulate the point we're trying to make, which is  
10 everybody thought Bill Markham was the inventor. The  
11 most knowledgeable people in this area, including Ruben  
12 Klamer, said repeatedly Bill Markham created it.

13 So the top layer there I had was Milton Bradley  
14 understood it. And again, you know, it kind of -- I  
15 put in "short note" there because Milton Bradley was  
16 told not to communicate with Markham, so he puts a  
17 short note and what you see is very short notes to Bill  
18 Markham cc'd to Ruben Klamer to make sure there was no  
19 issue; and they're not substantive.

20 All substantive communications go through Ruben  
21 Klamer and Milton Bradley, not cc'd to Bill Markham.  
22 That's a pattern. And he says there you have done a  
23 wonderful job; another piece of evidence. Milton  
24 Bradley understands it was Bill Markham. Milton  
25 Bradley understood that there was nobody else involved.

1                   THE COURT: But all Milton Bradley knows is  
2 based on their very limited information that either  
3 what they've been told or what they read in letters  
4 during that time and what they saw at Chasen's  
5 restaurant during the presentation; right? I mean no  
6 one from Milton -- there's no evidence that anyone from  
7 Milton Bradley was ever in the workshop or ever kind of  
8 watching what was going on or talking to anybody about  
9 who is actually doing the work. If they saw documents  
10 that said Markham created it, or if they went to a  
11 meeting and Markham presents it and says I did it, then  
12 I mean that's what they know.

13                  MR. POLLARO: Exactly, your Honor, and that's  
14 exactly the point. They were in meetings with Ruben  
15 Klamer, and Ruben Klamer was telling them Bill Markham  
16 did it. Didn't say Leonard Israel, didn't say Grace  
17 Falco. He didn't say "your team," he didn't say "you  
18 and your posse," whatever he might have said. He said  
19 "you." That's the point. That's what he was being  
20 told, and that's the consistent story for 58 years that  
21 was being told until this case.

22                  So, and this next letter is one of my favorites,  
23 actually. It's now we're not between Milton Bradley  
24 and Markham, or Link and Markham, we're between Milton  
25 Bradley and Link. So this is a completely unconnected

1 conversation that doesn't involve Bill Markham, but  
2 it's about Bill Markham, but he's not cc'd. Again, the  
3 pattern is he's been cut out. So what does it say? It  
4 says, you know, it's not a very exciting letter, but it  
5 says, "In reply to Link's letter of July 19th on the  
6 subject of the Life game of Bill Markham;" okay? That  
7 came from Link to Milton Bradley. Those two parties  
8 understood it was Bill Markham's game.

9 And again, the last point there, "The idea that  
10 you created through Bill Markham is really quite  
11 exceptional," is completely consistent with our theory.  
12 Completely consistent with the facts. Ruben Klamer  
13 told Milton Bradley that he had an exclusive contract  
14 with Milton Bradley -- sorry -- with Bill Markham. And  
15 as he testified at trial rather emphatically, Milton  
16 Bradley always took him at his word. So that's what  
17 happened.

18 So the "1965 Exchange." Again, there are lots  
19 of other issues in here, so again I'm not going to go  
20 through it. I think you understand the general concept  
21 there, but it's important because when we first started  
22 this in the kind of opening of the opening, there was a  
23 reference to a letter to a trade publication. Well,  
24 there was also a description from Ruben Klamer to Bill  
25 Markham what his contributions were to the Game.

1           So basically just to kind of back up a little  
2 bit, Bill Markham sees the Toy & Hobby World page 17.  
3 He sees that Ruben Klamer has been designated as the  
4 designer of the Game, the designer of the Game. Can  
5 you imagine what Bill Markham would do if he saw Ruben  
6 Klamer's face on the box? He probably would have had a  
7 coronary.

8           So what happened was when he wrote that letter  
9 and he said Listen, you got to fix this, you have to  
10 fix this, this is not okay. And Ruben Klamer said I'll  
11 fix it, I'll fix it. And he did fix it. So he wrote a  
12 letter to the publication and said by the way -- he  
13 didn't say by the way please describe me this way. He  
14 said don't associate me with The Game of Life at all.  
15 In other words, he's acquiescing to what Bill Markham  
16 and his party --. These were the two most  
17 knowledgeable witnesses in this case, and this is what  
18 their understanding is.

19           And so but I do want to point out that what  
20 Ruben Klamer said was he described his own  
21 contributions, and that's what we referred to earlier.  
22 He said Listen, don't forget, I'm the one that told you  
23 about The Checkered Game of Life and said wouldn't it  
24 be a great idea to update it. That was it. That was  
25 it.

1           And the last part there is, again, in the letter  
2 Markham is very clear: I'm the inventor, I'm the  
3 designer, I'm the developer; this is me. It's not you;  
4 you need to fix this. Klamer acquiesced, and in doing  
5 so -- and now I'm talking about the middle of the  
6 letter from Klamer, from Klamer to Markham. He said  
7 it's you, it's all you; it's you did a good job, you  
8 came up with a top-notch product. You, at my request  
9 -- and he loves to throw in that language, and we'll  
10 deal with that in the work-for-hire. You, at my  
11 request, were the inventor, designer, developer, you,  
12 Bill Markham. And again, he didn't say come on, Bill,  
13 it could have been -- I know, you and I know Leonard  
14 did it, you and I know Grace did it. He didn't say  
15 that. He said "you." And as he told you, your Honor,  
16 he was there. He says he was there. Okay. We'll have  
17 some dispute about that, but he says he was there. So  
18 he knows purportedly who did what, and he didn't say in  
19 this letter come on, Bill, pipe down, it was Leonard  
20 and Grace that did it for you. He didn't say that. He  
21 said you, you, Bill Markham.

22           And that's what this, this evidence, this  
23 58 years will say, the exact same thing. And quite  
24 frankly it gets better; the story gets a little better,  
25 your Honor. If it's dragging along I'll speed it up.

1                   So now we're in "1997." So what do we have?  
2 Bill Markham passed. Bill Markham passed I think in  
3 1992. So we have a letter written from Ruben Klamer to  
4 Mr. Hassenfeld, and I think by this point it might even  
5 be Hasbro, and he says Listen, this is what happened in  
6 1997; Bill Markham reduced my ideas to practice in  
7 concrete form of a three-dimensional prototype. That's  
8 creation. Bill Markham did this. Not anybody else;  
9 not Leonard Israel, not Grace Chambers. Bill Markham.  
10 This is 1997. This is Ruben Klamer telling it like it  
11 is.

12                  I put it there, won't spend a lot of time on it.  
13 Ironically, like in 1965, Ruben Klamer was a little  
14 hurt that he wasn't getting credit for being associated  
15 with The Game of Life, so clearly things had changed  
16 since Bill Markham had passed. So once Bill Markham  
17 had passed, Ruben Klamer had nobody that was going to  
18 call him out and was willing and able to tell everybody  
19 in the industry what his role was and to minimize Bill  
20 Markham and which, again, is why his picture is on the  
21 box.

22                  So, okay, "1989 Litigation." So I guess I put  
23 that out of order. Obviously we've talked about that  
24 before. That was a dispute primarily related to  
25 international royalties. Both of the parties were

1       deposed. Ruben Klamer repeatedly testified during his  
2 deposition that Markham, again that same language --  
3 and quite frankly that might be where the language from  
4 the '97 came from -- reduced to concrete form the high  
5 level concepts and ideas, the creator, Bill Markham, in  
6 1989 said Bill Markham. Again, another opportunity  
7 under oath to say it could have been somebody else, but  
8 didn't. Said Bill Markham. And that was the  
9 litigation, your Honor, where Ruben Klamer identified  
10 as imperative Bill Markham's rights; no one else's,  
11 Bill Markham.

12           So now I've kind of already touched on this, but  
13 so in the "Current Litigation," it's quite remarkable.  
14 In this case these witnesses have submitted  
15 declarations that sound nothing like what their  
16 testimony was. And again Ruben Klamer on January 16 in  
17 this case, "Mr. Markham produced a prototype." Do you  
18 think he would say that today? I doubt it. He didn't.  
19 He's saying the opposite. He's saying Markham didn't  
20 do anything. He is now an absentee employer. That's  
21 what this new thing is.

22           THE COURT: Well, I've been waiting to sort of  
23 ask you this, but the simple sort of reconciliation of  
24 all this business is that, you know, Markham was very  
25 aggressive about claiming credit during his active

1 years, it was very important to his business  
2 reputation, and he was very pushy about that and Klamer  
3 accommodated him and that resulted in all these  
4 documents that you've cited. And in his declaration I  
5 think he -- you know, everybody's testimony seems to  
6 be, the basics of it are Klamer goes to Milton Bradley,  
7 looks in the archives, he sees The Checkered Game of  
8 Life, he gets an inspiration, he sketches a bunch of  
9 things out, he says himself I'm not a toy designer, I  
10 don't know how to build models and things like that; I  
11 got this partnership with Markham, he's got a company,  
12 he's got people who work for him who are actually  
13 artists and actually went to art school and do that  
14 sort of thing. He hires Markham's company to do the  
15 prototype, and the prototype gets built in the  
16 workshop. I mean, it's like any other company;  
17 Markham's the boss, he's got Chambers and Falco  
18 working, Israel and Chambers or Falco, whatever we call  
19 her, working for him; and they do the grunt work, he's  
20 the boss, and ultimately a prototype is built and it's  
21 presented, you know, they present it and it's  
22 successful.

23 I mean all of that is not really inconsistent  
24 with the documents that you've put forward, and it's  
25 not really inconsistent with the testimony that's been

1       presented. The thing that makes all these things  
2       arguably inconsistent is if you have to have one person  
3       who did it, and it looks to me like there were a lot  
4       more than one person involved in creating this  
5       prototype.

6            MR. POLLARO: Your Honor, I appreciate the  
7       point. I think it's a great question. But it is  
8       inconsistent because -- and we'll get into some of the  
9       inconsistencies of the testimony. For example, in LA,  
10      as you may recall, in 1989 Ruben Klamer said he did not  
11      have firsthand knowledge of who worked on the  
12      prototype. He didn't know. He had to be told. He was  
13      told. Did Leonard Israel work on it? Bill Markham  
14      told me that he did. He had no firsthand knowledge.  
15      He wasn't there. That's not what happened. There are  
16      so many inconsistencies in this story, and we've poured  
17      them out in our brief, and I don't want to be --

18           THE COURT: Well, I don't really understand then  
19      why would Israel and Chambers fabricate that?

20           MR. POLLARO: Ultimately what I'm trying to do  
21      is --

22           THE COURT: They don't have a stake in this.  
23      They're not getting anything out of it.

24           MR. POLLARO: We don't know that. I absolutely  
25      don't know that. There are certainly, you know --

1                   THE COURT: There's no documents that say they  
2 have any arrangement with anyone to get anything out of  
3 this, and there's no testimony that says that. There's  
4 no evidence to suggest that they have a stake in the  
5 outcome of this.

6                   MR. POLLARO: Your Honor, I believe I asked  
7 Chambers, and it's the first time and I hope the last  
8 time, I'm pretty sure she objected to my question --  
9 she, the witness. When I was asking her questions like  
10 that she objected to my questions at least a dozen  
11 times, so I don't know, I just don't know. It never  
12 went anywhere from that.

13                  But it is inconsistent, but, your Honor, I want  
14 to put it in perspective because what you see here is a  
15 lot of work on routine aspects. You know, Bill  
16 Markham, when he testified -- and again, it wasn't the  
17 crux of that case. It was listen, this is what I was  
18 working on. Nobody had done that before. They didn't  
19 talk about -- it worked like clockwork, according to  
20 Leonard and Grace; right? You didn't hear about, oh,  
21 my God, there's no part, I don't have this material,  
22 I've never done this; how high are the mountains?  
23 Where do the mountains go? How does this fold work?  
24 None of that, because it had already been done. And  
25 they literally were doing routine things. They didn't

1 talk at all about Hey, listen, you know, it was a real  
2 bugaboo about this mountain and fold. Nothing.

3 So what they testified, and I think it's clearer  
4 in Israel's testimony, is I did thumbnails and then I  
5 was out; I don't know what happened. And that's the  
6 big, you know, that's the big -- okay, who created the  
7 final box? Well, you did the thumbnails, the tiny  
8 thumbnails that you thought might work. What happened  
9 at that? Grace did it. Ask Grace: What happened?  
10 You know, you did the final box. Leonard did it.  
11 That's exactly what they did. They worked on  
12 preliminary, draft, routine things. That's it.

13 Bill Markham is the only one in this case that  
14 has the knowledge, the skill, the training, and the  
15 evidence. That's the only person that can be the  
16 author of this thing.

17 And just one last point, your Honor. I don't  
18 mean to cut you off. That's what Leonard Israel  
19 testified at his deposition. That's what he said: I  
20 did routine tasks for Bill Markham. Routine, that's  
21 his word.

22 THE COURT: Well, the evidence, that unless you  
23 read it into the record as prior inconsistent  
24 testimony, which you may have, but I mean just so we're  
25 clear, the evidence of their testimony is what they

1           testified to in court; --

2           MR. POLLARO: Yes.

3           THE COURT: -- right?

4           Okay. So what is the evidence that Markham  
5 himself actually did any of these things other than the  
6 sort of negative inferences that you're asking me to  
7 draw from sort of the gaps and the positive inferences  
8 from the documents? Is there any other evidence? So  
9 for example, I don't recall, and maybe it's there and I  
10 just don't recall it, but for example -- well, let's  
11 start with this. What is Markham's skill and training  
12 for making boxes and molding mountains and all that  
13 kind of stuff?

14           MR. POLLARO: That's an excellent question, and  
15 that actually supports the fact that Markham would do  
16 that. Unfortunately there's no documents, there's no,  
17 you know, one thing that says this is Bill Markham's  
18 CV. There's nothing of that. But that's exactly what  
19 he did. He went to Hong Kong all the time to work out  
20 new molds and figure out what to do. I mean that's who  
21 Bill Markham was. That's what he was doing. And  
22 that's why -- I mean, you know, there's a little bit of  
23 testimony about, a little bit of evidence about some of  
24 the other things that he was creating, dolls and other  
25 things like that.

1                   And unfortunately the Markham parties are at a  
2 little bit of a disadvantage because Bill Markham is no  
3 longer here.

4                   THE COURT: Okay. Why don't you keep going.

5                   MR. POLLARO: Thank you, your Honor.

6                   So I've alluded to this and so I won't spend a  
7 lot of time on it, but everything changed in October of  
8 last year. Obviously your Honor would know much better  
9 than I do, but in my experience on the eve of trial a  
10 knew theory that becomes a focus is generally an  
11 indictment on the other theories in the case. And  
12 again, what we're talking about here is unsupported  
13 sweeping pronouncements without any documents, with no  
14 documents. I mean they're asking your Honor to elevate  
15 Leonard and Grace as authors when their names are not  
16 even in the record. And in fact, if I remember  
17 correctly Grace testified that The Game of Life was not  
18 on her resume. It was that unimportant. And along  
19 those lines, that's also part of the story.

20                  They testified in LA that they knew what the  
21 arrangement was with Ruben Klamer, Milton Bradley and  
22 Art Linkletter, whatever the parties were, and they  
23 knew it was roughly a third, a third, a third. They  
24 didn't see contracts, but Grace Chambers testified in  
25 LA that she knew what that was, and she testified that

1 Leonard knew what that was. And you know what? They  
2 didn't say anything. They didn't say anything for  
3 58 years. They never said why does Bill Markham keep  
4 getting a royalty? Why does everybody think Bill  
5 Markham did this? Never, never said that. And that's,  
6 again, just another piece and it just puts a  
7 perspective to the story they're trying to sell you  
8 right now. It doesn't add up.

9 So the good news is I think we've touched on a  
10 lot of this so we can probably go relatively quickly  
11 here. What I was attempting to do here was say listen,  
12 the universe of people that we're talking about is  
13 small, it's five people; they're listed there.

14 And Klamer, I'm curious to see what they have to  
15 say. As far as we're concerned, he cannot be an  
16 author. I mean adamant, I didn't create anything; I'm  
17 out. So we'll see what they have to say.

18 Sue Markham is similar, similar. You know,  
19 people like to throw her name out; yeah, she was the  
20 one typing up the rules; she was the scrivener; she was  
21 the one that had the typing skills; she was the one  
22 that could put the rules down on paper. And there's  
23 plenty of evidence where Bill Markham referred to her  
24 as his secretary. That's what she was. She was a very  
25 important secretary, but that's what she was doing.

1       No evidence that she did anything substantive, and that  
2       is just mere speculation; again, inconsistent with the  
3       58 years of record evidence.

4                   So I'll go over these relatively quickly.  
5       Chambers said nothing on the cover, nothing at all on  
6       the cover. And then what Israel testified about was,  
7       yeah, I did sketches, that's it, and then I was out.  
8       He testified very clearly: I didn't do the final  
9       cover; I have no idea; I don't know the size, don't  
10      know how it looked; nothing. The testimony is not  
11      reliable because, I refer to it, they each pointed to  
12      each other when the question came up, Who did it?  
13      Where did it go from there? They each obviously, for  
14      whatever reason, pointed at each other. Nobody is  
15      left.

16                  Bill Markham. Bill Markham is the one that did.  
17       Bill Markham is the one that testified -- and I'll skip  
18      over those. Those are just the cites of the testimony.  
19      And obviously if I put it in red it's super important.

20                  So here, Bill Markham's testimony. He was  
21      testifying about the things that you expect somebody  
22      who did this, like yeah, you know, it was a pain in the  
23      butt; I had to make the top of the board an inch  
24      shorter so you could see all the accoutrements, the  
25      pieces in the game; right? These are the things you

1       would expect somebody that created it to testify about,  
2       and that's what he did. None of that came out in LA.

3           Similar thing on the gameboard, and I tried to  
4       do this in, you know, kind of a summary fashion to not  
5       get bogged down, so I'll just go relatively quickly.  
6       Israel -- again, similar thing. Israel didn't work on  
7       the gameboard. Chambers says she worked on the  
8       gameboard. You know, obviously from her declaration to  
9       her deposition, you know, she certainly wasn't in  
10      charge of it at that point. The most I got out of her  
11      was she worked on balsa wood buildings, and then at  
12      trial becomes the mastermind or the purported manager  
13      of that thing. And so again, the gameboard doesn't add  
14      up. And then the specifics, too. There's no testimony  
15      at all from the witnesses about creation of the  
16      spinner. They say, yeah, it's Bill's thing; they  
17      wanted it noisy. You know, they just avoid it, they  
18      just avoid it, the track, things like that.

19           Bill Markham created the gameboard and all the  
20       component parts. And I'll jump to the -- yeah, Markham  
21       testified in his deposition that was in my board,  
22       already had that.

23           Again, putting it in perspective, it's this idea  
24       that they were doing the routine tasks. They were  
25       staff artists. They were -- I can't recall the dates

1 right offhand, but I'm pretty sure they were a year or  
2 two in. They were really junior, very junior. And so  
3 I think it was Mr. Israel's first job and I think, I  
4 think it might have been Grace Chambers' first job as  
5 well. These guys were doing routine tasks at the  
6 direction of Bill Markham. And again, you know, they  
7 haven't shown that he was working on prototype. We  
8 just don't know. We just don't know.

9 Now, the creation, okay, so a lot of talk about  
10 binding. Binding is important. Binding is how the  
11 game came together. And there's no dispute it's a  
12 three-piece board and it's got multiple parts and  
13 things like that, and all those things had to work.  
14 But it's interesting because, you know, when we asked  
15 Grace about it she had no idea, no idea; you know,  
16 looked at the invoice and said yeah, it's on here, we  
17 must have done it. We must have done it. "We" is  
18 Bill; because Leonard hadn't done it, and Sue wasn't in  
19 that business. So again, you know, there's some  
20 argument in the Defendant's papers that we're saying  
21 that's (unintelligible) arguable. Absolutely not.  
22 Absolutely not. We're saying that's evidence that Bill  
23 Markham is the one that's creating. He's the one  
24 that's creating.

25 And so it's interesting Mr. Orbanes testified

1       that that's exactly what you would expect about  
2       binding. He knew what binding was. He said yeah, I  
3       would expect somebody who did binding to be the  
4       creator -- sorry -- a creator to understand binding.  
5       That's the way he said it.

6           So the gameboard summary, you know, meant to  
7       just kind of knock out the parties? It's Bill Markham.  
8       Bill Markham is the creator. And the rules, similar  
9       thing; you know, they try to throw it out there that  
10      Sue Markham did this so there's simply no credible  
11      evidence or no evidence at all that Bill Markham did --  
12      or, I'm sorry, that Sue Markham did.

13       And so then underlying all of this is this  
14      inconsistent testimony. So in 1989, excuse me, as we  
15      talked about in LA, Ruben Klamer said I didn't have  
16      direct knowledge of those, of who was working on it; I  
17      was told by Bill Markham that Leonard Israel and Grace  
18      Falco worked on it.

19       Fast-forward to this case. He's apparently  
20      hovering over Grace Chambers and Leonard Israel knowing  
21      everything they did. And so this is the big problem  
22      with the new story, is if the Court believes that Ruben  
23      Klamer was in that room twice a week hovering over  
24      Leonard and Grace, then in 58 years he didn't mention  
25      their name. He didn't mention their name. He said

1 Bill Markham, okay? And so if he wasn't in that room  
2 and he didn't know what happened, and Grace and Leonard  
3 did that, did the work, then they misrepresented that  
4 he was there twice a week. Somebody is getting thrown  
5 under the bus, which it's either Mr. Klamer or it's  
6 Leonard and Grace. Those stories cannot reconcile.  
7 And so that's the point of this slide.

8 So to kind of summarize the authorship, you  
9 know, we have a remarkable record from the  
10 contemporaneous time that says Bill Markham is the  
11 creator, designer, developer, inventor, the maker, the  
12 reduction of practice, whatever term you want to use,  
13 for almost 60 years without exception, and even in this  
14 case. And the story they're selling right now is  
15 inconsistent, and it's mere speculation about what it  
16 was.

17 But interesting, we don't need to speculate  
18 about how it was created because we know. We know when  
19 the Game was completed, and that was at Chasen's in the  
20 week of August 10th, 1959.

21 So their story doesn't add up; mere speculation.  
22 Our story, 58 years of record. And you know what? We  
23 even have that pinnacle moment when Bill Markham  
24 testifies, and Ruben Klamer as well, Bill Markham put  
25 the track on the board, glued it down for the first

1 time, the first time that game was complete. Bill  
2 Markham --

3 THE COURT: So I'm glad you brought that up  
4 because I wanted to ask you about that. So is that the  
5 critical moment? Let's say that Leonard and Grace  
6 worked on various components, you know, the houses,  
7 getting the spinner to make noise, whatever. They did  
8 various things. But they also testified that a lot of  
9 the pieces had to go out to be molded. I think they  
10 said it went to the plastic company or whatever.

11 MR. POLLARO: Exactly. What I interpreted their  
12 testimony, they didn't know. They were just doing kind  
13 of their routine tasks and they didn't know, and then  
14 obviously we showed them the invoices that showed  
15 plastics and things like that; so yeah, that's where  
16 that came from.

17 THE COURT: So there's all this work kind of  
18 going on and sketches and maybe models, little parts of  
19 it, but there is this testimony from Markham that it  
20 was all put together there at Chasen's when the track  
21 was put on the board and everything was put into place.

22 So you seem to be saying that's when the  
23 prototype was actually complete and that was the first  
24 time it was complete, that it was a bunch of components  
25 up to that point, --

1 MR. POLLARO: Absolutely.

2 THE COURT: -- and that's when it's complete and  
3 it was Markham that presented it. Right?

4 MR. POLLARO: Correct.

5 THE COURT: Okay. So I guess what I'm trying to  
6 get to is, you know, there is this theory of joint  
7 authorship out there, and is it sort of critical when  
8 it finally comes together as a prototype, is that some  
9 great event in terms of its copyrightability versus  
10 when lots of the pieces are being made that come  
11 together?

12 MR. POLLARO: It can be. But yes, yes, the  
13 short answer is yes. And so with respect to I think  
14 you're referring to the joint authorship argument of  
15 Klamer. And so the first element of that -- by the  
16 way, everybody always kind of skips to the second part  
17 about that, but the first element is that the parties  
18 intended for the work to be a joint work, and so  
19 clearly that prong, I mean the 1965 Exchange would bear  
20 that, would shoot that down immediately. There has to  
21 be an intent to be joint authors.

22 But even the joint authors, they have to do the  
23 creation of the final thing, and so just doing routine  
24 components isn't enough.

25 THE COURT: Okay.

1                   MR. POLLARO: So now I'm going to move on to  
2 this statutorily-protected work. So the Defendants  
3 argue that it is unknown what was deposited in the  
4 copyright office. I mean quite frankly, your Honor,  
5 I'm a little bit surprised that we're arguing that.  
6 That's simply not the case. It's irrelevant which  
7 version of the Game bearing a 1960 copyright date was  
8 deposited. It simply doesn't matter; for copyright  
9 purposes they are all the same, copyrightably  
10 indistinct, and Mr. Orbannes testified to that.  
11 Hasbro's corporate witness knows that. If it's got the  
12 same date, it's the same game for copyright purposes,  
13 so any changes, any distinctions, there are none for  
14 copyright purposes.

15                  And this idea, and I'll just mention it briefly,  
16 I'm terrible with analogies but the The Sword and the  
17 Shield, the way I understand Hasbro's argument is if  
18 it's unknowable what was in the copyright office, they  
19 could never pursue an infringement claim against  
20 anybody; and I know that's not what they're arguing  
21 because there's only three registrations to the game.  
22 So it just kind of puts it into perspective that that's  
23 not what the law says.

24                  As we just marched through, Bill Markham is the  
25 creator of this game, and the work that was deposited

1       was a copy of Bill Markham's prototype. That's what  
2       happened. They took his game and copied it for  
3       commercialization, and that's what you have.

4           Did they make economic or changes? Yeah, they  
5       made some changes. And you know what happened? That  
6       happens in every single case, every single case.  
7       There's no situation where you can go from the  
8       prototype to the commercial mass market without some  
9       changes. Both experts said that. I don't think  
10      anybody disagrees with that. But that's the whole  
11      point; the changes can't be trivial. The cases say  
12      they can't. Yes, there's a low bar, but they can't be  
13      trivial. You can't lower mountains. There's cases  
14      that say you can't take something seven inches and make  
15      it five and expect that to be copyrightable. It's not.  
16      It's different. It's a change, yeah, it's noticeable,  
17      but that's not what the law is. And it's not the  
18      intent of the parties.

19           Bill Markham created this game, always held  
20      himself out to be the inventor, the designer,  
21      developer. That's what this summary is.

22           And then this whole idea about aesthetics.  
23      Again, attorney argument; no evidence of that  
24      whatsoever. That showed up for the first time. Again,  
25      going back to the Ruben Klamer declarations, he in very

1 detailed fashion tells what the economic changes were;  
2 they were, you know, I took the 3-D mountains or I  
3 suggested the 3-D bridge come down and I printed the  
4 thing. He had, you know, three or four suggestions  
5 that he provided. No mention of aesthetics. No  
6 mention of spinner. It's just remarkable how different  
7 those declarations are from what we heard in LA.

8 And just another example is what Mr. Orbanes was  
9 testifying to. The substance of Mr. Orbanes' testimony  
10 was yes, I see differences and as someone in the  
11 industry those are aesthetic changes and that's why you  
12 do them, because we know men like ovals, or I forget  
13 the exact situation. I think Bill Markham had put a  
14 diamond on there or something like that, and Orbanes,  
15 in his training in the industry says, you know what,  
16 ovals are more pleasant to both sexes so we want to put  
17 an oval there.

18 Those are exactly the rote, common, uncreative  
19 things. Every change that he talked about, he said  
20 they're all aesthetic. But you know what? When I  
21 asked him if they were all based on any particular  
22 individual at Milton Bradley, which has never been  
23 identified, any particular thing about Milton Bradley  
24 why that would be done? He said no, I know that  
25 because I'm in the industry. In one he even told me he

1 knew that since college. He was taught that in  
2 college.

3 That's exactly the point. And he said everybody  
4 knows, if you look at rules and you got certain things  
5 in the back, you move that up front, whatever that  
6 scenario was. All plug-and-play, all not creative.  
7 That's what Mr. Orbanes testified about, and that's  
8 happened.

9 And your Honor, I apologize, I didn't bring the  
10 prototype of the Game, but I think you get the point  
11 that this was a very well-developed prototype. I mean  
12 I appreciate Mr. Klamer's age, and so I'm kind of half  
13 joking but, you know, he doesn't tell the difference.  
14 Twice he told me that it was the commercial version of  
15 the Game. You know, he's the one that knows the most.  
16 It is a spitting image, and there's evidence in the  
17 record, it is a faithful interpretation of Bill  
18 Markham's prototype.

19 I just want to point out the case I mentioned  
20 about moving the seven inches to five inches. This is  
21 that *Batlin* case, which is 536 F.2d 486. It says they  
22 can't be trivial; the changes have to be meaningful and  
23 creative.

24 THE COURT: You've got about 15 minutes left.

25 MR. POLLARO: I will speed it up.

1           All right. Work-for-hire, you know, that's  
2 their defense. We think it's their issue; we'll let  
3 them tell you differently.

4           It's very simple on the work-for-hire. It's bad  
5 law. It's bad law. I'll do that last just to kind of  
6 get to the point, but it's bad law. And you don't have  
7 to take my word for it. The Eleventh Circuit has said  
8 it's bad law. Nimmer has said it's bad law. Lots of  
9 people much smarter than me have said it's bad law.  
10 And the rationale, quite frankly, for Supreme Court is  
11 remarkably simple.

12          The second reason is the expense is not  
13 satisfied. And then the third is even if the bad test  
14 is applied and satisfied, it's rebutted. So they have  
15 to get over all these hurdles in order to win their  
16 work-for-hire, quite frankly, which is why I think they  
17 hired the work-for-hire for Leonard and Grace.

18          So the expense prong, I'll just be very simple  
19 on this. It is in the record. It is in the license  
20 agreement and, your Honor, I'm not going to point you  
21 to it but I think Tab 1, the \$5,000. So the whole crux  
22 of the expense prong is who bore the financial risk of  
23 the endeavor? Who was on the hook? Who was on the  
24 hook for this? And so what we see is under any, you  
25 know, accounting, math, or whatever you do, Ruben

1 Klamer is the only one that never goes negative. He  
2 never loses; right? I mean Milton Bradley coughed up  
3 the \$5,000, gave it to Ruben Klamer, and all these  
4 documents are there: We've signed the agreement, we  
5 are sending the \$5,000. Thank you; I have received the  
6 \$5,000. Bill Markham, here is the 2400 for your  
7 prototype.

8 But we see all that; and in the license  
9 agreement, it's remarkable. It says I am paying you  
10 out of the 5,000 I received from Milton Bradley. He  
11 simply did not bear any risk. He is the only party  
12 that didn't reach into his pockets, the only party.  
13 And the only party, quite frankly, that lost on this  
14 was Bill Markham because he had to pay -- although he  
15 got his costs back -- he had to pay it out of his next  
16 royalty check so, quite frankly, he's the one that paid  
17 for it.

18 THE COURT: But he used the \$5,000 to pay  
19 Markham for creating the prototype; correct?

20 MR. POLLARO: When he passed -- he got the  
21 \$5,000 from Milton Bradley.

22 THE COURT: Right.

23 MR. POLLARO: And then --

24 THE COURT: And then he got invoiced from  
25 Markham.

1                   MR. POLLARO: Exactly. And again, the  
2 contract -- I want to make sure we're crystal clear.  
3 The license agreement says I am paying you with the  
4 \$5,000 I received from --. Okay. I just want to make  
5 sure that -- I'm not just saying that. That is what is  
6 in the agreement. It say I have received \$5,000 from  
7 Milton Bradley and of which I am paying you, yeah.

8                   THE COURT: All right.

9                   MR. POLLARO: But again, we don't dispute that.  
10                  But again, going back to -- your Honor, I don't mean to  
11 cut you off. I am trying to hurry a little bit, but  
12 the whole crux of that prong of this bad test is who  
13 bore the financial risk of the endeavor. And it wasn't  
14 Ruben Klamer. It couldn't be. He didn't reach into  
15 his pocket. I mean maybe he put the 5,000 in his  
16 pocket and pulled it out again, but he didn't reach  
17 into his own pocket.

18                  THE COURT: Well, he did when he paid out a  
19 portion of the \$5,000 to Markham to create the  
20 prototype, and theoretically if it costs more money to  
21 create the prototype than he had received as an  
22 advance, he would have had to pay that out of his own  
23 money; right?

24                  MR. POLLARO: Absolutely no evidence of that  
25 whatsoever.

1           THE COURT: Well, I mean it just stands to  
2 reason, doesn't it?

3           MR. POLLARO: If the prototype would have been  
4 more than \$5,000? Your Honor, I don't think -- he  
5 reached -- I'm trying to follow your question. So in  
6 the hypothetical, if the prototype was more than  
7 \$5,000? That's speculation.

8           THE COURT: Well, but it's also speculation that  
9 Markham bore any economic risk.

10          MR. POLLARO: And just to be clear, and your  
11 Honor, I'm glad you brought that up. It doesn't  
12 matter. By the way, I shouldn't have thrown that in as  
13 an aside because it doesn't matter, by the way, that  
14 Bill Markham actually paid for this. It just doesn't  
15 matter. It's just kind of an aside.

16          What matters is who bore the financial risk of  
17 the endeavor, and that was Milton Bradley. So I  
18 apologize if I confused or threw you off. Don't worry  
19 about Bill Markham because it doesn't matter. It's  
20 just kind of an extra to say, you know, in fact he's  
21 the one that lost. But it doesn't matter. Legally  
22 it's irrelevant. The whole analysis is who bore the  
23 financial risk of the endeavor, and it was not Ruben  
24 Klamer. It simply was not.

25          THE COURT: Okay.

1                   MR. POLLARO: Now, the agreement to the -- so  
2 again, bad law; not met. If for some reason those two  
3 hurdles get passed, it's rebutted. They cite no cases  
4 that come anywhere close to a reservation of rights.  
5 And quite frankly I'm not even sure I understand what  
6 their reservation of rights argument is.

7                   All of the cases that talk about this  
8 reservation or this instance and expense test say if  
9 there's a reservation of rights in the author there is  
10 no work-for-hire. And the whole premise of these  
11 cases, which by the way -- I have to say this -- only  
12 existed for a short period of time. The *Marvel* case  
13 has a fantastic summary the first 50 years of the Act,  
14 independent contractors out, never work-for-hire, and  
15 then the '76 Act you have to actually say this is a  
16 work-for-hire, so out after that. So it was literally  
17 this window of 10 or 15 years where this silly test was  
18 being applied, and almost as soon as it came Congress  
19 started changing it. So these cases are just literally  
20 an anomaly.

21                   But the whole point is if the author retains --  
22 it's about the intent of the parties at the time of the  
23 agreement and so it doesn't matter what -- we could  
24 agree that pigs will fly. It doesn't matter if pigs  
25 will fly. If I retain the rights to whatever I

1       assigned you when pigs fly, that's the point. It's not  
2       a work-for-hire. That's the whole point. So to the  
3       extent I understand it, this idea of when rights -- it  
4       doesn't matter. The whole point is the intent of the  
5       parties.

6                 And there's the agreement. I don't think  
7       there's any dispute about what it says. But I want to  
8       get to the actual evidence of what this meant and what  
9       it meant to Bill Markham. He said in his deposition in  
10      1989 -- and this was talking about the negotiation with  
11      respect to the assignment agreement -- I put in one  
12      clause and I insisted on some kind of qualifying clause  
13      in there that in case Link Research did not perform as  
14      per their agreement with me, the whole game would  
15      return to me.

16                 That's what that provision means. That's  
17       exactly a reservation of rights. Let them tell you  
18       it's not, and we can go from there. But Bill Markham  
19       had every intention of reserving the game. And  
20       honestly, that's the way he did it. You know, there's  
21       testimony in his deposition; he said Listen, I don't  
22       design games for any particular company because then I  
23       got a dead game if that company doesn't want it. I  
24       design stuff that I want to design and I can take it  
25       where I want to take it if they don't want it. That

1 was his MO, and he's got it here.

2 Just one quick point on the instance and  
3 expense, and your Honor probably appreciates this more  
4 than me. These are the smart people, by the way, that  
5 have said that it's no good anymore. But it hasn't  
6 been decided in this circuit, the way I understand it.  
7 It's been used, we don't dispute that, it's been used,  
8 but it's never been challenged. So as far as we're  
9 concerned, our understanding of the law is that has not  
10 been decided, and so I'll just leave it as that.

11 Joint authorship, I think I'm very interested to  
12 see what the defense has to say on this, so I could  
13 probably do that.

14 And then the derivative exception, this is going  
15 to be interesting. You know, we had very clear  
16 testimony from Mr. Orbanes that, you know, I think we  
17 went back and forth, like any change, you know,  
18 removing a transmission tower could be derivative; you  
19 know, any change. And so that doesn't add up when you  
20 talk about this analysis that they did. They did this  
21 on the derivatives; they looked at the most current  
22 version and the prototype. That doesn't make any sense  
23 because, as Mr. Orbanes testified, it's a progressive  
24 process. Every game is built on the game before it,  
25 upon the game before it, upon the game before it. And

1       so what you have is you can't just look at the  
2       differences between the first and the last. You have  
3       to look at every one, and Orbanes said that.

4           And what the cases say is a work or works, so  
5       they don't spell it out, but that also makes common  
6       sense. If every change -- if any change, removing a  
7       transmission tower is not derivative, then you can't  
8       just look at the last one that says that it's not there  
9       and therefore it's a derivative. You have to look at  
10      each version.

11           THE COURT: But let's say you're right about  
12       that and you look at each version and you do it in a  
13       progressive fashion. It's not unreasonable to conclude  
14       that at some point along the way in a 60-year evolution  
15       of a game like this that some of the changes are going  
16       to qualify as creative and there is going to be some  
17       aspect of derivative work that filters through that  
18       60-year history. Now maybe it's not everything that  
19       Hasbro contends, but even so, maybe it's half of the  
20       changes are derivative, maybe it's a quarter. Whatever  
21       it is, then what do you end up with at the end? I mean  
22       it's kind of like you have to kind of follow the chain  
23       down, don't you?

24           MR. POLLARO: I understand. Hypothetically I  
25       think that's absolutely right. And so the problem we

1 have in this case is I've asked multiple times for all  
2 the versions -- I haven't gotten them -- for the Game,  
3 so, you know, we can't do that analysis. They just  
4 haven't turned them over. They can't tell me what they  
5 are. I mean -- so it sounds like you'll be hearing  
6 about that.

7 MR. KRUMHOLZ: Yes.

8 MR. POLLARO: But you're absolutely right, your  
9 Honor, and ultimately, if I understand your question  
10 correctly is that what you do is you have to look at  
11 the starting point, yes, you absolutely do. And so I  
12 mean the funny -- the way I understand it, if I  
13 understand your question, is you can do the reverse.  
14 You can say there are -- let's just hypothetically say  
15 you decide we're entitled to terminate some rights for  
16 the spec. Let's just hypothetically say that. I don't  
17 need to go through every version to determine if I can  
18 terminate the spinner in the current version, because I  
19 can see this is what I'm entitled to, and I see it  
20 there. You see what I'm saying? But you can't do the  
21 reverse. You can't say that's derivative, that's  
22 derivative, that's -- I mean, sorry, you have to go  
23 through each version to determine whether or not it's  
24 derivative, and they simply have failed to do that.

25 THE COURT: Well, I may not understand this

1       quite right, and all of you will tell me if I don't,  
2       but it seems to me there's several ways that you can  
3       look at this, and I don't know which one is right. But  
4       one way is to compare the current commercial versions  
5       to the original and ask the question are there creative  
6       changes that make the current commercial versions  
7       derivative works? And I think you're saying that's  
8       what they are saying, and I'm just --

9                    MR. POLLARO: And that's wrong.

10                  THE COURT: -- so that's one way to look at it.

11                  MR. POLLARO: Yeah.

12                  THE COURT: Another way to look at it is the one  
13       you suggest which is, I think, that you have to take  
14       every successive version and compare each one to the  
15       one before it and determine on a game by game and maybe  
16       even a component by component within each game by game  
17       version whether the next work is derivative. I think  
18       that's kind of what you're saying.

19                  MR. POLLARO: Exactly. But it sounds like, and  
20       again I don't want to cut you off, but it sounds like  
21       you're making it a little bit too complicated; right?  
22       I mean basically at each version you look and see what  
23       the delta is, like what's the delta, and then you look  
24       at those things and say, okay, that one is derivative  
25       of, or there are no deltas, that's not derivative;

1 right? It's as simple as that; right?

2 THE COURT: Sure. But there has to be something  
3 at the end of all that because other than this boutique  
4 gamer site where they sell the old versions, the real  
5 money is in the commercial sale of the games, what's  
6 out there now selling; right?

7 MR. POLLARO: Uh'huh.

8 THE COURT: That's where the money is.

9 MR. POLLARO: Yeah.

10 THE COURT: So even if you do what you suggest,  
11 there has to be some way to put that all together at  
12 the end of the chain and say, okay, what is this thing  
13 that's on the shelf? Is it fully a derivative work, or  
14 is it partially a derivative work, and how do you get  
15 there?

16 MR. POLLARO: Well --

17 THE COURT: So that's the second way of doing  
18 it. And it seems to me there's like a third way that's  
19 sort of maybe in the middle, which is kind of like sort  
20 of looking at it holistically in some way, whether  
21 something is, you know, whether a work is, the majority  
22 of it is new, there's enough new stuff in there that's  
23 creative that it becomes a derivative work; you don't  
24 have to break it down by component, you don't have to  
25 look whether it's the spinner or the track or whatever;

1       it's just there's enough there to make a derivative  
2       work, so it's a derivative work. And I don't really  
3       know which of those, if any of them, is the way to do  
4       this.

5                    MR. POLLARO: And your Honor, quite frankly, I  
6       think I'm a little confused myself. But I think what  
7       I'm hearing is I think it's related to the way I said  
8       you can do one versus the other, because depending on  
9       what you're looking for; right? If you're looking for  
10      -- say we got termination rights, and we got  
11      termination rights and prototype. Just use that as a  
12      hypothetical. I can go to each, any version at any  
13      point and figure out, okay, that's out; right? That's  
14      the same, that's out, that's out; right?

15                  But if I'm starting from, okay, is this game  
16      different, okay, Orbannes testified very clearly that  
17      it's a progressive process, every game is built on the  
18      one before it. Like they didn't say the new game's  
19      based on prototype. They could have said that; right?  
20      Then that would be the right analysis. They didn't do  
21      that. Orbannes said the opposite, that each game is  
22      built on the one before that, and so because of that  
23      you have to go through each version.

24                  And again I think ultimately the confusion, if I  
25      understand it, again with that caveat, is it depends on

1 what you're looking at it for. And the point you said  
2 about, you know, yes, you can look at the similarities  
3 and things like that, that is the other flip side of it  
4 for the different reason, more the termination, you  
5 know what I mean, that side.

6 THE COURT: Okay. I think you're at the end of  
7 your presentation.

8 MR. POLLARO: I am, so I'll spare you -- so we  
9 believe on the weight of the evidence we win.

10 And then I do want to say this just very  
11 quickly. The Defendants told you last time we met that  
12 I believe they used the word *de minimus* and they say,  
13 you know, it's not that important, it doesn't matter.  
14 It's very important to the Markham parties, extremely  
15 important to the Markham parties, and that's why we're  
16 here. And I think Linda Mack Ross is just another  
17 example of that. She upset her world, you know, she  
18 ended up being sick for two weeks after here. She  
19 describes it as almost dying with this never heard of a  
20 bomb cyclone before.

21 But it is very important to the Markham parties,  
22 and that's why we're here. And if there are attendant  
23 benefits that are, that we received because we're here  
24 for the right reasons, so be it. But we're here for  
25 the right reasons. We're here to stop what happened in

1       1965, like Bill Markham did, and what's happening  
2       today, your Honor.

3           Thank you, your Honor.

4           THE COURT: Thank you, Mr. Pollaro.

5           All right. I think it would make sense to take  
6       a break, so let's take a 10-minute break. Let's go off  
7       the record for a moment.

8           (Discussion off the record)

9           (Recess)

10          THE COURT: Mr. Krumholz.

11          MR. KRUMHOLZ: Thank you, your Honor. So I  
12       first will be guided by what the Court wants to talk  
13       about, but my intention is to make two high-level  
14       observations, talk about some of the specific points  
15       raised by you, by Mr. Pollaro, and then launch into  
16       some of the other items I want to talk about in the  
17       PowerPoint and in my outline. So two high-level  
18       observations; one is --

19          THE COURT: Do you have a hard copy of the  
20       PowerPoint?

21          MR. KRUMHOLZ: Yes.

22           (Pause)

23          THE COURT: Thank you. Go ahead.

24          MR. KRUMHOLZ: So first high-level observation  
25       is quite candidly there were an extraordinarily large

1       amount of misstatements of the record and the law that  
2       were made during that presentation. I'm going to cover  
3       some of them, but I can't cover all of them. One of  
4       them I have to waste 30 seconds on, and it is a waste  
5       because it doesn't bear on the issues before the Court;  
6       but Mr. Pollaro made the statement we did not, Hasbro  
7       did not make all versions of the Game available to him.  
8       In fact, Mr. Pollaro himself was in a warehouse where  
9       every version of the Game was made available to him.  
10      He and Mr. Cole physically took pictures of all of  
11     those versions and at one point was seeking to admit  
12     them into evidence. So, just a patently false  
13     statement.

14           The other high-level observation is since the  
15       beginning of this case and to the present they still  
16       haven't tried this case for what it is. It is a  
17       copyright case. It is not a case about expression --  
18       about ideas, it is not a case about whether Mr. Markham  
19       thought that a spinner was a good idea or a circuitous  
20       track was a good idea. We dispute that that evidence  
21       is credible; but even if we credit it, the issue is did  
22       he physically create an expression of an idea, and they  
23       have not tried that case from the beginning through  
24       now. And we'll talk about that in a little more  
25       detail.

1           So some of the things I want to talk about in  
2 particular, just to get them off the table, as it were.  
3 There was discussion about the registrations and a  
4 representation made we don't dispute that the  
5 registrations are wrong. That's not correct.

6           So the relevance of the registrations could be  
7 this, that what is listed in the registrations creates  
8 a presumption. It's a rebuttable presumption. So we  
9 could have gone into this case and said there is a  
10 presumption that Milton Bradley is the author and the  
11 owner, based on the registrations. We didn't because  
12 we don't really have -- because there's nobody else  
13 from Milton Bradley; we didn't have the evidence to  
14 support that.

15          But there is a very logical explanation as to  
16 why they registered it in the manner in which they did,  
17 which is that Milton Bradley believed that the work  
18 done was done as a work-for-hire for it. It asked  
19 Mr. Klamer to do something. Mr. Klamer then hired  
20 somebody else to do something. It was a -- that's the  
21 most logical reason as to why they registered as they  
22 did. It's to a large degree neither here nor there  
23 because, as I said, we didn't have the evidence to  
24 support the presumption, as it were; but I don't want  
25 the Court to think that there's an illogic to it.

1                   And just to put a bow on that, the reason that  
2 Mr. Klamer or Link was listed as the author for the  
3 cover is most likely because it had Mr. Linkletter's  
4 picture on it and they were very protective of  
5 preserving that right. So there are answers for all  
6 that; I just want to make sure the Court is clear about  
7 that.

8                   A couple of points raised by Mr. Pollaro. He  
9 said if the testimony of Ms. Chambers and Mr. Israel  
10 were true, Mr. Klamer would have sought an assignment  
11 from the two of them. That's makes no sense under the  
12 law because there's no dispute that they were employees  
13 of Mr. Markham's company. And I think there is still  
14 an open evidentiary question as to whether that was a  
15 corporation and who owns their actual rights.

16                  But if we credit the point, if we credit that  
17 they worked for Mr. Markham individually, he was their  
18 employees (sic), nobody disputes that. Anything they  
19 created would have inured to him on a work-for-hire  
20 principle. There would be no reason for Mr. Klamer to  
21 seek to get anything from them. So that's not  
22 inconsistent at all with our position.

23                  They also, Mr. Pollaro also raised the point why  
24 would Mr. Markham get a royalty and not Ms. Chambers  
25 and Mr. Israel if indeed they contributed. It's the

1 same answer. That's the life of an employee. What  
2 they do is they get a salary, and in exchange for the  
3 salary the company gets the fruits of their work. So  
4 again, a perfectly logical explanation for that.

5 A third -- oh, one other thing on the  
6 registration which I should point out, and we see this  
7 on page 26 of the slide, is they have made this  
8 argument in their papers and made the argument again  
9 today that Mr. Markham was duped, that he was never  
10 told about the registrations; indeed, they say, this is  
11 the great vindication that they've come here for to  
12 correct the wrong about what was put on the  
13 registrations for the copyrights because he was lied to  
14 by Milton Bradley and by Mr. Klamer. But he was asked  
15 at his deposition in 1989 about this, even though it  
16 wasn't relevant to that case. He was asked:

17 "Do you recall asking" -- and this was referring  
18 to Mr. Klamer -- "whether such protection was  
19 available?

20 "Answer: No. I just assumed that the  
21 manufacturer would take out the copyrights on it."

22 So nobody -- and I will say that that reflects a  
23 further point, which I'll get to in more detail in a  
24 little bit, as to who was acting like the copyright  
25 owner. But here he's aware or assumes that Milton

1 Bradley is going to be taking out copyrights. There is  
2 no evidence in the record that he objected to such a  
3 thing. There's no evidence in the record that he  
4 suggested that that was wrong. He was not acting like  
5 he owned the copyrights. And he certainly wasn't duped  
6 by anybody, as has been alleged here.

7 The unfinished board argument, your Honor asked  
8 about that. There's two -- so in that 1989 deposition  
9 he talks somewhat amorphously about having created an  
10 unfinished board or a board game, and I think there are  
11 two aspects I think the Court needs to think about with  
12 regard to that. One is this: When he was asked to  
13 describe how finished it was, at his deposition, he  
14 said -- the question: "What was unfinished about the  
15 game at the time that you had your discussions with  
16 Mr. Klamer?" "Answer: Almost everything."

17 All right. That's not the whole answer, but  
18 that's sum and substance for purposes of this. The  
19 reason I raise that is because we're back to the idea  
20 versus expression concept. Again, if we want to credit  
21 the testimony, the testimony at best establishes that  
22 he had some ideas, but there's nothing in there -- if  
23 we want to talk about the spinner -- there's nothing in  
24 the record to suggest that whatever spinner he planted  
25 on there looked anything like the spinner that showed

1 up in the prototype and showed up in the commercial  
2 version which, by the way, looked different between the  
3 two of them; right?

4 So the best we can credit is that he came up  
5 with the idea of the spinner, and the best we can  
6 credit is that he came up with the idea of the  
7 circuitous track. But those are ideas. He needs to  
8 have had, he needs to have physically created the  
9 expression that shows up in the prototype in order to  
10 have a copyright right, and there's zero evidence in  
11 the record in that regard.

12 But we would also submit that there's, that the  
13 evidence in the record is clear that those claims are  
14 not credible, because if he had done what he said he  
15 did, somebody must have known. He must have told  
16 somebody; right? But we asked the living people that  
17 we could ask about it; right? We not only asked  
18 Mr. Israel, and I'll talk about his credibility as we  
19 go along, and we not only asked Ms. Chambers, and I'll  
20 talk about her credibility as well; but we also asked  
21 Ms. Ross, which is their witness that she flew in from  
22 Arizona who was close to Mr. Markham. Apparently they  
23 had a relationship where it's the kind of thing he  
24 would have said to her, because she seemed to idolize  
25 him when she was a teenager. All three of them made

1 clear that they had no idea what we were talking about.  
2 Nobody ever said such a thing.

3 So we don't have the benefit of being able to  
4 cross-examine Mr. Markham, which is why we had filed  
5 our motion that this testimony shouldn't come in. But  
6 the only evidence we have from the actual live  
7 witnesses makes his story not credible.

8 One of the other points raised by Mr. Pollaro  
9 was that the declarations from Ms. Chambers and  
10 Mr. Israel were I think -- sound nothing like their  
11 testimony. I think he used the word "starkly" in  
12 describing the difference between the declarations and  
13 their testimony, and he kept kind of muttering about  
14 the fact that he would show it to you. I'd like to  
15 show them to you. They're in their exhibit binder,  
16 Tab 20, if the Court will indulge me.

17 So Tab 20 is JTX56, and it's the declaration of  
18 Ms. Chambers, and if we refer to paragraph 5, and I'll  
19 read it, she stated in her declaration: "Another  
20 artist who was working for the advertising agency at  
21 the time, Leonard Israel, also worked on the game  
22 project. He and I worked on the game board model,  
23 which was based on the ideas and instructions that  
24 Mr. Klamer had provided to Mr. Markham. Mr. Israel was  
25 responsible for designing the packaging for the game.

1       While we were working on the project, Mr. Klamer  
2       frequently visited the office to oversee the game's  
3       progress and approve elements of the design along the  
4       way."

5                  I would respectfully submit that that is a  
6       hundred percent consonant with her testimony, which  
7       obviously elaborated but is entirely consistent with  
8       that.

9                  If we go to Tab 21, which is JTX57, that's the  
10       declaration of Mr. Israel, and if we go to paragraph 7  
11       in that document here's what he stated in the  
12       declaration: "I was responsible for designing the  
13       packaging for the game. I would prepare sketches of  
14       ideas I had about the different ways the packaging  
15       could look. I would then present the sketches to Ruben  
16       and Bill and we would discuss them and decide which to  
17       use. It was my idea to make the box white. Everyone  
18       else thought it should be red, which was the prevailing  
19       color for toys at that time. I thought it would make  
20       the game stand out from other games on the store  
21       shelves."

22                  I respectfully will submit that Mr. Pollaro's  
23       characterization is false, that the declarations are  
24       entirely consistent with their testimony.

25                  Actually while we have the binder out, they

1 point to Tab 24 as proof of Mr. Klamer's concession  
2 that Mr. Markham, you know, did everything. You had  
3 observed earlier that the testimony taken as a whole  
4 would suggest that Mr. Markham was very aggressive  
5 about preserving his legacy, as he saw it, and that  
6 Mr. Klamer was the kind of person that would  
7 accommodate that. So it's PTX20 which is at Tab 24,  
8 which is a back and forth of letters dated September 4,  
9 September 21, and September 24, 1965. The last letter,  
10 which is the letter to the publisher that Mr. Pollaro  
11 characterized as capitulating the point that  
12 Mr. Markham did everything, essentially, and I'll read  
13 from that letter. He said: "Although I know what my  
14 contribution was in the project, I want to eliminate  
15 any hassle with this particular individual because of  
16 the annoyance or irritation that could possibly be  
17 involved."

18 I would respectfully submit, again, that piece  
19 of evidence is entirely consonant with the observation  
20 that your Honor has made with regard to how Mr. Klamer  
21 and Mr. Markham interacted with each other.

22 You also asked about Mr. Markham's skill set,  
23 and Mr. Pollaro gave you an answer about Hong Kong and  
24 this and that. The honest answer is we have no idea  
25 what his skill set was because there's nothing in the

1 evidence or the record to tell us what his skill set  
2 was. And I'm not going to represent that he didn't  
3 have skills, but I'm also not going to represent that  
4 he did have skills. But this is their burden of proof,  
5 and there's no evidence in that regard.

6 He also, Mr. Pollaro also said that, you know,  
7 since 1959 there had been no discussion at all with  
8 regard to Ms. Chambers and Mr. Israel playing a role in  
9 the creation of the Game. That's a representation that  
10 he made. Well, this is Mr. Markham's deposition:

11 "Question: All right. I think you testified  
12 previously that among the people that worked on the  
13 Game was Grace Falco Chambers and Leonard Israel?

14 "Answer: Yes. And my wife."

15 Mr. Klamer, for his part in the 1989 deposition,  
16 which is June 26, 1989, on page 111, lines 4 through 8,  
17 says: "With Leonard Israel and Grace Sarreras"  
18 (phonetic) -- that was her name, it changed over the  
19 years -- "and Bill Markham, I knew their capacity  
20 because they worked under the agreement I had with them  
21 as an agency for eight or nine years, and I knew  
22 graphics would reduce it down to a concrete form."

23 So indeed, they are mentioned and they were  
24 mentioned by the two main people involved here.

25 You also asked the question, your Honor, about

1       whether the moment of creation was at the time that the  
2       final piece was put in at the restaurant; and we would  
3       submit that that is not the time of creation. Both  
4       sides agree that rote actions do not constitute  
5       creative conduct. They seek to extrapolate beyond what  
6       the evidence shows. But the physical act of taking the  
7       last piece and plunking it on the track is the  
8       quintessential rote act that could not remotely allow  
9       one to have the status of author. It was when they had  
10      put down, you know, the idea, you know, fully expressed  
11      on the board is when it happened, and we don't know  
12      exactly what that date was.

13           You also asked about, well, what happens if the  
14      prototype costs were more than \$5,000, wouldn't they  
15      have to pay that amount, and I'll talk about this a  
16      little bit more in my presentation. But I think the  
17      answer is off course yes on the record, based on the  
18      record and based on the evidence, because the  
19      fundamental fact on the expense prong is that it is  
20      undisputed that at the outset of the project Mr. Klamer  
21      unconditionally agreed to pay the costs. That's where  
22      the risk began. The risk began when work was started  
23      without knowing whether Milton Bradley would buy the  
24      Game; right? And the undisputed evidence from  
25      Mr. Klamer is that he unconditionally agreed to pay as

1       of that time, which was consistent with what he had  
2       done with the girls' cosmetic deal which was I think a  
3       year earlier. And it was consistent with other  
4       projects of the time where he was paying, he was  
5       agreeing to run the royalty but also agreeing to  
6       unconditionally pay the cost. That's the risk; right?  
7       I mean it's --

8                  THE COURT: Well, wouldn't you say that the risk  
9       -- so that's one risk, and I think you probably agree  
10      the other risk is Milton Bradley decides to take the  
11      game and produce it and at that time they're bearing  
12      the risk if nobody buys it; right?

13                MR. KRUMHOLZ: Right, that is their risk kind of  
14      down the road. But the quintessential risk, well,  
15      first of all it matters greatly the risk between -- so  
16      right now we're trying to figure out -- let's back up a  
17      little bit.

18                We're trying to figure out who owns the  
19      copyrights before they get transferred to Milton  
20      Bradley. Once Milton Bradley gets them and by virtue  
21      of the license agreement they're off and running. So  
22      we look at, you know, our position has been  
23      work-for-hire; right? Work-for-hire, let's look at  
24      that to determine who owns the copyrights at that  
25      moment. What the law tells us is we look at the

1 instance and expense test to make that determination;  
2 right? So when we look at the expense, the expense is  
3 who is bearing the risk; right?

4 THE COURT: Right, and I'm with you all the way.  
5 So your contention is that the only person who is not  
6 bearing risk is Markham, and Israel and Falco because  
7 those two were employees so they're getting paid by the  
8 hour, and Markham is getting paid based on his invoice  
9 to Klamer, --

10 MR. KRUMHOLZ: Right.

11 THE COURT: -- so there's no risk to that. And  
12 I don't think there's any evidence to this, unless he  
13 agreed to do it for a fixed price and his expenses  
14 might have exceeded that.

15 MR. KRUMHOLZ: Right. And there's no evidence  
16 of that; right? I mean there's always a kind of  
17 theoretical risk that, you know, Mr. Klamer goes  
18 bankrupt and can't pay.

19 But in terms of the understanding between them,  
20 what the understanding was between them, which is what  
21 you look at, there is no dispute in the record as to  
22 what that was. It was Mr. Klamer unconditionally  
23 agreed to pay the cost; right?

24 And so what I was trying to get to, and I backed  
25 up probably a little too far, is the period of time of

1 risk between the two of them is the time where somebody  
2 begins to do work and the time when a decision is made  
3 that actually bears the fruit. So we look at the, you  
4 know, the first day of the action by his company up  
5 until the moment when Milton Bradley says we're going  
6 to give you money. Who bears the risk that that work  
7 will be for naught? There's no dispute on the record  
8 on that. It is Mr. Klamer, because he has agreed to  
9 pay.

10 The case law that we have cited, and I'll  
11 hopefully have time to get to this in the slide deck,  
12 is unequivocal on this. Every case where there is a  
13 promise to pay the cost has always found that the  
14 expense prong is satisfied, regardless of whether  
15 there's an additional benefit of a running royalty.

16 So with that I'd like to back up, if I could,  
17 and talk a little bit more about authorship. So I mean  
18 the good news is we do have areas of agreement between  
19 us. We do agree that they have the burden of proving  
20 authorship, that work-for-hires are expressly excluded  
21 from Section 304(c), and therefore the only way that  
22 they can prove authorship in this case is to prove that  
23 Mr. Markham physically created something; that the  
24 supplying of ideas, direction, even describing the work  
25 is not in and of itself enough to make somebody a

1       copyright author. They may have other rights. And I'm  
2       just going to digress for a second because you had  
3       asked about this at the last day of trial, and  
4       Mr. Pollaro talked a little bit about this.

5                  The assignment agreement and the license  
6       agreement carries with it a bundle of rights. Whatever  
7       those rights may be, a very standard practice not just  
8       there but everywhere is I don't know what rights you  
9       have, I don't need to parse out all the rights you  
10      have; but whatever rights you have, you're going to  
11      give them to me, whether by license or assignment, so  
12      that I know I have all the rights I need to go forward  
13      and sell and make this product.

14                 And we know that there were some rights that  
15      Mr. Markham had because he and Mr. Klamer together  
16      applied for a patent. Now, that's entirely consistent  
17      with all the evidence because all the evidence suggests  
18      that Mr. Markham played probably a meaningful role in  
19      this process and his contributions were ideas and  
20      suggestions and direction. That's what you get a  
21      patent for. You get a patent for ideas; right?

22                 So whether he -- he might have some trade secret  
23      rights, he might have some other rights. The point is  
24      that that all -- and Mr. Klamer himself did not only  
25      receive Mr. Markham's rights, but presumably had rights

1       of his own because he contributed ideas. He was an  
2 inventor on the patent. All of that got bundled in the  
3 license agreement to Hasbro. So it's not a copyright  
4 license; right? This license agreement doesn't get  
5 terminated, you know, if, even if Mr. Klamer didn't own  
6 the copyrights because there's a whole bundle of rights  
7 there. So I just want to be clear on that with the  
8 Court in case the Court has any concerns about that.

9           But the last point I want to raise here is not  
10 only does Mr. Markham need to have physically created  
11 something, but that something that he created needed to  
12 be the subject of statutory protection under the 1909  
13 Copyright Act. He's wrong under the law in terms of  
14 how that could be created. He said that the only way  
15 it could be created is by publication. That's true,  
16 that is one way of creating statutory protection; if  
17 you published a work with the proper copyright notice  
18 under the 1909 Act you do get statutory protection.  
19 But the other way is to deposit the materials with the  
20 copyright office and get it registered. They're  
21 disjunctive; you can do either one. And what the  
22 copyright registrations tell us is the materials were  
23 deposited. All right. It gives a date, so there's a  
24 presumption that that actually happened.

25           You had asked the question about, well, you

1 know, kind of what's the status of that deposit  
2 material, and here's where we get into a best evidence  
3 rule problem I know seldomly invoked, but here I think  
4 legitimately invoked because it creates all kinds of  
5 problems about not knowing what was actually there.

6 One thing we know we don't have is a copy of  
7 what was deposited. That's the best evidence. And the  
8 best evidence rule applies to works like this. I think  
9 the *Seiler* case said that, but we've cited the case in  
10 our brief.

11 So we start with what the best evidence is. Go  
12 to the copyright office, get a copy of what was  
13 deposited, then we know what we're talking about. We  
14 don't have that.

15 Now, in the best evidence rule, 1002 and 1004,  
16 you can overcome that, but to overcome that you have to  
17 show to the Court's satisfaction that the materials  
18 were lost, okay? Well, that's, that shouldn't be that  
19 hard to do. You go to the copyright office, you make a  
20 request for the deposit materials, and you find out  
21 what you get back. You either get back the deposit  
22 materials, or they tell you that they don't have them  
23 anymore, or they tell you they're not going to give  
24 them to you, or whatever. You've done your diligence  
25 to find out.

1           Very, very late in this game, i.e., at the time  
2 of their briefing, post-trial briefing, they represent  
3 for the first time that they made that effort. Now  
4 we've been asking about this all along because we've  
5 known this is a problem. We inquired ourselves just to  
6 find out what would be involved and, you know, we went  
7 no further. But we knew that this was always going to  
8 be an issue, and we told them this many times. We put  
9 out an interrogatory where we asked them what steps  
10 they took. They invoked the privilege.

11           There is no evidence in the record that they  
12 actually made the requisite effort to find out if those  
13 materials are lost. And I know, you know, I would  
14 assume the Court doesn't want to be deciding this on  
15 what may be perceived as a technicality, but this is  
16 their obligation, this is their burden, and the  
17 evidence is just insufficient; and it does matter,  
18 right, because this entire case we've been trying to  
19 understand are you saying the prototype was registered  
20 and deposited? Are you saying that a commercial  
21 version was? Which commercial version was it?

22           We understand that each of the commercial  
23 versions had a 1960 copyright. And Mr. Orbanes  
24 certainly testified that with regard to those different  
25 versions, unless they were substantially different you

1       probably were not going to get -- put a new copyright  
2       notice on it. But it's also entirely possible that  
3       they were derivatives of each other, and that matters  
4       when we're trying to figure who, what rights, what is  
5       in which. I mean, these things matter.

6           And it matters for another reason. I honestly  
7       still don't have my arms totally around this, your  
8       Honor, but here's what they have to prove. The only  
9       thing that they've claimed is that Mr. Markham created  
10      the prototype. But they do not assert that the  
11      prototype was what was statutorily protected. It was  
12      some commercial version. It's not reasonably disputed  
13      that there are differences between them. We had the  
14      testimony from Mr. Orbannes about that.

15           For them to prevail they have to show what is  
16      in the prototype Mr. Markham physically created and then  
17      show that that also shows up in what was registered and  
18      deposited with the copyright office. They can't win  
19      their case unless they connect those dots; right? And  
20      that's why Mr. Pollaro actually pushed back when you  
21      were helping him out a little bit saying, well, didn't  
22      he potentially create the spinner? Well, okay, but we  
23      don't know whether -- there's no proof of physical  
24      creation of the expression that shows up in the  
25      statutory version. That's why he said to you no,

1       Mr. Markham created everything; because unless they can  
2       say that Mr. Markham created everything they can't  
3       connect the dots. They just can't prove their case.  
4       And it is patently absurd to suggest that Mr. Markham  
5       created everything.

6           THE COURT: So let me just make sure I  
7       understand this. It seems like an important point. So  
8       what we don't -- the problem is we don't know exactly  
9       what the prototype looked like; right? There's no  
10      evidence that shows us what the prototype looked like.

11       MR. KRUMHOLZ: Well, we have some photos. We  
12      have the imperfect photos of the prototype.

13       THE COURT: Are those of the actual prototype?

14       MR. KRUMHOLZ: Yes.

15       THE COURT: Okay.

16       MR. KRUMHOLZ: But they -- for instance, we  
17      can't see the text on the board.

18       THE COURT: And what exhibit numbers are those?

19       MR. GORACKE: JTX509.

20       MR. KRUMHOLZ: JTX509, Mr. Goracke is saying,  
21      yes, and he's given me a thumbs-up.

22       THE COURT: 509. And then what we have in  
23      evidence are the earliest versions of the actual  
24      commercial game, which I think the earliest version, I  
25      forget what exhibit it is, but I think it was like a

1       1960 version; right? '60 or '61; I can't remember.

2           MR. KRUMHOLZ: So there are five versions in the  
3 record, all of which have a 1960 copyright notice date,  
4 all slightly different from each other. There's  
5 nothing in the evidence that tells us which one was  
6 first.

7           THE COURT: All right. So that's part of my  
8 question was of those various versions what order, and  
9 we don't know the order?

10          MR. KRUMHOLZ: There's some speculation, but  
11 it's no more than that.

12          THE COURT: All right. So we have these five  
13 early versions, they all have the 1960 copyright date,  
14 and what you're saying is that there's just no way to  
15 know which one of those versions or some other version  
16 was the one that was deposited at the copyright office;  
17 so there's this missing link in the chain between the  
18 photos of the prototype and the earliest versions;  
19 right? And that's where we are to start. And so if we  
20 assume that, can't I at least look at or do a  
21 comparison between the prototype photo and the early  
22 versions and do a derivative analysis, a derivative  
23 works analysis as to those two?

24          MR. KRUMHOLZ: Yeah, and that's what we've done.  
25 And that's fine as far as it goes on the derivative

1       side. But it doesn't help them sign the authorship  
2       problem, right, because -- so let's kind of even raise  
3       this a little higher up.

4           They're seeking to terminate a transfer. That  
5       would be the, whatever is the subject of the assignment  
6       agreement as it applies to copyrights. They're saying  
7       it's the three copyrights that were registered.

8           But the only thing that they can terminate is  
9       what he physically created that was transferred. He  
10       could have -- from a contractual matter, because he  
11       owned the work done by Ms. Chambers and Mr. Israel as a  
12       matter of copyright law as work-for-hire, so when he  
13       transferred -- if he had copyrights to transfer,  
14       copyright interest to transfer, he transferred that  
15       whole bundle; right? It would have been what they  
16       created plus what he created, to the extent they could  
17       prove he created something. But the only thing he  
18       could claw back is what he physically created because  
19       the copyright statute tells us that the work-for-hire  
20       contribution does not apply; right? So the only thing  
21       that could be the subject of this whole termination  
22       action is whatever sliver that Mr. Markham physically  
23       created and that he subsequently transferred.

24           And this is where their case fundamentally falls  
25       apart because they want you to look at the documents

1 and say look at all these documents that show he was an  
2 inventor, a designer, whatever, developer; that means  
3 that he was the author.

4 But that hardly means that he physically created  
5 anything. An analogy, an example I give is this  
6 PowerPoint. I hope you find this PowerPoint useful. I  
7 also hope that Mr. Turner, who works for Hasbro, finds  
8 it useful, and I hope that he says to me afterwards you  
9 did a great job on this PowerPoint. Now, I can  
10 volunteer that Ms. Framroze actually created the  
11 PowerPoint, or I can take the credit for myself. All  
12 those exchanges are no different than Mr. Turner  
13 telling me, as the head of the team, that I did a good  
14 job on this PowerPoint.

15 It never gets to the question of whether  
16 Mr. Markham physically created anything. So what they  
17 have to say is he created everything, as evidenced by  
18 the fact that he has this status as inventor, designer,  
19 developer. And that is absurd. I'm sorry, but it's  
20 completely absurd. It's absurd in part because their  
21 own expert says everything was done in six weeks. How  
22 in the world is one person getting everything, all this  
23 done in six weeks, when they say even everybody working  
24 together it's unlikely to get done in six weeks.

25 It's also absurd because, and I think we showed

1       this already, because Mr. Markham himself said that  
2       other people worked on it. It is also absurd  
3       because -- oh, and these are just some examples, but in  
4       our brief we talk about all the times in his deposition  
5       and documents that Mr. Markham talks about the work  
6       that "we" did. He speaks in the plural. He doesn't  
7       suggest that he did everything.

8           And it's also absurd, and we get this, oh, they  
9       said, you know, Mr. Israel and Ms. Chambers were  
10      mentioned in passing in the invoice. This Slide 10 is  
11      a portion of the invoice. They weren't just mentioned  
12      in passing. Mr. Klamer paid for six weeks of their  
13      full salary for the work that was done on this. He  
14      paid for their entire time. The Markham parties sit  
15      here and tell this Court that, oh, they only did rote  
16      stuff in the part-time. They literally used the word  
17      "part-time." Okay. Well, then Mr. Markham committed  
18      fraud because he told them that they worked full-time,  
19      and Mr. Klamer paid full-time.

20           So we know beyond doubt that Ms. Chambers and  
21      Mr. Israel played a meaningful role here; right? The  
22      question then becomes can they show that Mr. Markham  
23      did some physical contribution. And you asked the  
24      question of Mr. Pollaro where is the evidence that  
25      shows that Mr. Markham physically created something?

1 And there's nothing. There just --

2 THE COURT: Well, the evidence, I mean the  
3 evidence that I get from Plaintiffs' case is that it's  
4 two things, may be related; it's documentary,  
5 contemporaneous documents in which statements are made  
6 that they say reflect what the reality was at the time,  
7 which is that he designed, created, and all the words,  
8 and it's the, sort of the gaps in the sort of negative  
9 inferences that you can draw from the lack of evidence  
10 that anyone else did. So the way I get their case is  
11 they put these two things together and say, look,  
12 there's a lot of documents that say he created  
13 everything and there really isn't anything else besides  
14 this testimony of Israel and Chambers and Klamer, which  
15 they say is completely fabricated and inconsistent, and  
16 if you put all of that together there's nothing else to  
17 show that anybody else did it and never any documents  
18 that said he did it, and that's the theory, I think.

19 MR. KRUMHOLZ: I agree with all of that. I  
20 think that is their theory.

21 What the documents show is entirely consistent  
22 with somebody who played a meaningful role, a  
23 meaningful enough role to get a patent, a meaningful  
24 enough role to be acknowledged as inventor, designer,  
25 developer, and a meaningful role in supervising,

1 providing input, providing information, providing  
2 thoughts, providing direction. I mean what he did is  
3 unknowable, you know, 60 years later, but all the  
4 evidence suggests that he did play a role and it was a  
5 role of that nature. All the documents are a hundred  
6 percent consistent with that.

7 But that's not the question for the Court. The  
8 question before the Court is whether he physically  
9 created something. And there is nothing -- you know,  
10 if he physically created, if he did a sketch, you know,  
11 where is it; right? I mean if we want to go with a  
12 negative inference, you know, this is his baby, this is  
13 the thing that has paid him millions of dollars, and he  
14 said out of nowhere, you know, I had this unfinished  
15 board; where is the board? I don't have the cite on  
16 hand, but in 1989 he said yeah, I think I have some  
17 sketches in my attic or in my garage or wherever.  
18 Well, where are they? They haven't been produced in  
19 this case; right?

20 There is no -- if we're going to go with the  
21 negative inference, this is their burden. They have to  
22 show that there was physical creation on his part. And  
23 the documents are consistent with somebody who's played  
24 a role, but not consistent with or inconsistent with  
25 somebody who physically created something. And so then

1       we look at the other evidence, right, the other  
2       contemporaneous documents and testimony, and we have  
3       the invoice, as we talked about. We have each of their  
4       testimony in 1989. We know that Ms. Israel --  
5       Ms. Chambers and Mr. Israel played a meaningful role,  
6       six week full-time. And then we have their testimony;  
7       right? And their testimony, right, the Court has  
8       already acknowledged this, but their testimony could  
9       not have been clearer: "I was assigned to come up with  
10      what the box cover should look like." That's  
11      Mr. Israel.

12           And who did the packaging? And then from  
13      Ms. Chambers:

14           "Question: And who did the packaging?

15           "Answer: Leonard Israel did it."

16           And from Ms. Chambers, "Question: What role, if  
17      any, did Ms. Chambers" -- oh, from Mr. Israel:

18           "What role, if any, did Ms. Chambers have in  
19      connection with the creation of the game board?

20           "Answer: She put it all together and did the  
21      final art work on it."

22           The question to her:

23           "Who did the actual hands-on work of building  
24      the prototype game board?

25           "Answer: Well, I did a fair amount of it.

1 Leonard helped somewhat and whenever he could cause he  
2 had other projects that he was working on.

3 "Question: So just to be clear, you built the  
4 houses of the prototype; is that correct?

5 "Answer: I did, yes.

6 "Question: Did you build the mountains on the  
7 prototype?

8 "Answer: Yes.

9 "Question: Did you construct the elevated track  
10 physically on the prototype?

11 "Answer: Yeah, I'm sure. Yeah, it's many years  
12 ago, but I do, I do recall working with the different  
13 materials and the cardboard and forming it and so on."

14 So for the Court to conclude anything else, as  
15 Mr. Pollaro has said, they really have to -- your Honor  
16 has to conclude that they were lying.

17 And they go through a significant exercise in  
18 trying to show inconsistencies to the Court in their  
19 testimony to make that case, and this is where frankly  
20 things gets a little troubling. Troubling in terms of  
21 advocacy because they, for instance, say in finding of  
22 fact 99, they state that Mr. Israel did not physically  
23 create anything. And below that are the cites that  
24 they rely on to have the Court adopt that finding of  
25 fact. The first one is Mr. Israel saying that he was

1 assigned to come up with the box cover and what it  
2 should look like. Doesn't seem like it supports that  
3 statement.

4 The next one is just a discussion about what  
5 Ms. Chambers did, which is not inconsistent. The next  
6 two are what Sue Markham did, not inconsistent. And  
7 the last one is the discussion about the fact that  
8 Ms. Chambers took the sketches, the art work that  
9 Mr. Israel created and did what would indeed be a rote  
10 process of enlarging it into a box cover. So we can  
11 dismiss that fabrication.

12 Findings of facts 102 and 103. They claim that  
13 Mr. Israel said that Ms. Chambers created the cover,  
14 and Chambers said that she did not.

15 All Mr. Israel said in the cite that they  
16 reference is what I just talked about; Ms. Chambers did  
17 the physical process of enlarging the art work that was  
18 created by Mr. Israel. And then Ms. Chambers  
19 truthfully said, to the question of who did the cover,  
20 it was Mr. Israel, because the creation of the cover  
21 was the art work that he did in the sketch. Nothing  
22 inconsistent there.

23 And then they claim that Mr. Israel and  
24 Ms. Chambers performed only routine tasks, and they say  
25 both of them. There is not a single cite that

1       discusses Ms. Chambers at all, but they threw her name  
2       in there and asked the Court to adopt that as finding  
3       of fact.

4           And they cite to Mr. Israel's deposition. What  
5       Mr. Israel was talking about, and this is in our brief,  
6       is his first year on the job. He was not talking about  
7       the work that he did. Again, not an accurate  
8       representation.

9           Your Honor asked about this, their claim that  
10      Ms. Chambers didn't know what "binding" was, findings  
11      of fact 104 through 106. When you go -- first of all,  
12      not remembering about binding is hardly a reason to  
13      believe that she got up to the Court and lied. But  
14      independent of that, when you look at the testimony,  
15      she didn't understand the question which came out of  
16      the blue from Mr. Pollaro in that context. Asking  
17      about binding, she didn't connect the dots. When she  
18      was shown the invoice it was clear that there was  
19      recognition, saying Oh, you're talking about the  
20      binding for the work on the board, sure, that makes  
21      sense. So it doesn't even support the proposition that  
22      they claim.

23           Then they have a whole independent finding of  
24      fact that says that Mr. Israel and Ms. Chambers didn't  
25      know important facts. Again, the cites don't mention

1       Mr. Israel at all, yet they make that statement. And  
2       all they're doing is citing to the binding cite that I  
3       talked about above.

4           And the last one, they claim that it's not clear  
5       whether Mr. Israel and Ms. Chambers worked on the  
6       prototype. Their entire support for that is  
7       Mr. Markham's testimony that he created multiple  
8       prototypes, and from that apparently they want the  
9       Court to infer that it's not clear that they worked on  
10      a prototype. And by the way, with that testimony, to  
11      go back to producing the best evidence, where are all  
12      those prototypes that Mr. Markham created? What effort  
13      have they made to find those and produce those?  
14      Because we haven't seen those either.

15           So I guess in sum, you asked the question is  
16       there any reason not to believe them. What is their  
17       skin in the game? The answer is they have no skin in  
18       the game. I mean we asked them whether they had any  
19       skin in the game, and they said they didn't. But we  
20       also asked them more particularly, you know, about  
21       their relationship with Mr. Markham because maybe they  
22       hold a grudge. I mean we affirmatively asked.  
23       Mr. Israel said he enjoyed his time working there.  
24       Ms. Chambers said, you know, she had good relations  
25       with them, it was just time for her to move on.

1           You know, they had the opportunity to  
2 cross-examine these witnesses. They had the  
3 opportunity to test out these theories and allow the  
4 Court the opportunity to see the demeanor of the  
5 witnesses and to see whether, you know, there was any  
6 reason to question. They frankly just wasted our time  
7 in cross-examination and then come up here with all  
8 this nonsense and challenge their integrity.

9           They talk about this being a legacy issue. Now,  
10 none of that matters for the Court, but I would say  
11 that there's a great deal of irony in pretending that  
12 this is a legacy issue for them when Mr. Markham knew  
13 that copyrights were being registered and didn't care.  
14 And they actively frankly for no other reason than  
15 greed wanted to totally subtract not only Mr. Israel's  
16 contribution, not only Ms. Chambers' contribution, but  
17 Sue Markham, his own wife's contribution.

18           They said that the status quo does not change.  
19 And again, I'm not going to pretend that this matters  
20 for your decision-making, but I think it's just  
21 important to get out. The reason they say the status  
22 quo does not change is because if the Court somehow  
23 rules in their favor, they don't intend to terminate.  
24 They intend to go and try to hold this up.

25           This is not about legacy. This is about

1       Mrs. Markham, the Plaintiff, who lives in LA, not even  
2 showing up to sit in the back of the courtroom about  
3 this critical case about her late husband's legacy,  
4 can't even come to the courtroom to see what these  
5 witnesses have to say, the people that knew her late  
6 husband personally.

7           So with that, I'd like to talk about  
8 work-for-hire. So the first question is burden. Who  
9 has the burden of proof on the work-for-hire. We  
10 certainly acknowledge all the cases they cite stand for  
11 the proposition that defendant has the burden of proof  
12 on work-for-hire because it's an affirmative defense.  
13 But all those cases are infringement cases. That's not  
14 what we're dealing with here.

15           This is a matter of first impression. As far as  
16 I know, I think we give one compare cite which does  
17 suggest that it's the defendant's burden, but I don't  
18 think that issue was addressed with that court; I think  
19 they just kind of jumped in.

20           But we would submit this, that the reason I have  
21 the statute up here is this is a statutory claim. You  
22 need to satisfy all the elements in the statute in  
23 order to prove your claim. One of the elements in the  
24 statute clearly is that they have to show that the  
25 copyright is other than a copyright in a work-for-hire.

1       And, in fact, as you'll see in the bottom of this slide  
2       they accidentally admit as much in their brief. On  
3       page 5 of their memorandum they say: Termination  
4       rights under Section 304(c) require that certain  
5       conditions be met. Of those conditions, only two are  
6       in dispute...The second is that the copyright at issue  
7       must not be a copyright in a work made for hire.

8           They kind of gave it away there because they  
9       have that burden. I mean I don't think it matters at  
10       the end of the day because I think the evidence is  
11       clear on work-for-hire, but it is, I think, a threshold  
12       question that the Court is going to need to decide in,  
13       you know, whatever written opinion comes out of this.

14           They also have made the point in their papers,  
15       they made the claim in their papers that the instance  
16       and expense test does not, does not -- has been  
17       abrogated. They don't cite a case for that. They did  
18       in the reply cite an Eleventh Circuit case, the *MGB*  
19       case that Mr. Pollaro alluded to. That case does not  
20       stand for that proposition remotely. It's a 1976 Act  
21       case that talks about the Supreme Court case only to  
22       talk about it in that context.

23           But what we do know, and they've acknowledged  
24       now after their initial briefing, is that the First  
25       Circuit applies the instance and expense test and has

1       done it on numerous occasions; not just the District  
2       Court of Massachusetts, but the First Circuit post-CCNV  
3       has applied consistently the instance and expense test,  
4       and it's clear why. When you look at the opinion from  
5       the Supreme Court, it's clear that they're just giving  
6       a -- it's a 1976 Act case. They're just giving a  
7       historical discussion about the 1909 Act. So I don't  
8       think there can be any reasonable doubt that it still  
9       applies.

10           So we have then the application of the test.  
11          The instance prong they don't dispute. There's  
12          actually nothing in their papers to suggest that they  
13          disagree that the instance prong is satisfied. As we  
14          have here on Slide 20, the standard is that "'Instance'  
15          refers to the extent to which the hiring party provided  
16          the impetus for, participated in, or had the power to  
17          supervise the creation of the work."

18           And, you know, the undisputed facts are as you  
19          described them, your Honor. Mr. Klamer brought the  
20          opportunity to Mr. Markham's company. He was their  
21          client. He supervised, instructed, provided  
22          parameters, approved the prototype. I don't think --  
23          there is no question because they haven't disputed it.

24           So the only real issue is whether the expense  
25          prong is met, and we've talked about this a little bit.

1       The standard for that is that under the expense prong,  
2       "the focus is not on who bore the costs or expense in  
3       physically creating the work itself (the money spent to  
4       purchase the paper...the typewriters...the pencils and  
5       ink...etc.) Instead, the focus is on who bore the risk  
6       of the work's profitability;" right?

7                   So at the risk of repeating myself, we need to  
8       look at Mr. Klamer and Mr. Markham and the moment in  
9       time when the work was to begin, and the question is  
10      who is going to bear the risk that this becomes a  
11      profitable endeavor.

12                  THE COURT: So that window runs from the point  
13       where Klamer reaches out to Markham and hires him  
14       essentially to produce this prototype through to the  
15       point where I guess Markham bills Klamer for the work;  
16       right?

17                  MR. KRUMHOLZ: I would say there are two points,  
18       two end points. I wouldn't say that's the end point.

19                  THE COURT: Okay.

20                  MR. KRUMHOLZ: I would say it arguably -- the  
21       first potential end point is when Milton Bradley signs  
22       the license agreement and agrees to pay money, because  
23       we know some money is now being paid for this work.  
24       But I would argue that that's not really the end point  
25       because, one, from Mr. Klamer's standpoint he doesn't

1 know how big the bill is going to be. He doesn't  
2 know -- most of that money that they're going to get up  
3 front is going to go to the cost. He's, of course,  
4 incurred his own expenses; you know, the record talks  
5 about him making trips and the like. So whether he  
6 ever sees anything beyond his costs, whether he gets a  
7 profit is not going to be known until we see whether  
8 there are any sales here and how significant the sales  
9 are.

10 So I would say Mr. Klamer's risk really runs  
11 through until you start aggregating enough sales to put  
12 him out of the red and into the black, and we don't  
13 know specifically when that date was. We know that  
14 date happened because they made millions of dollars.  
15 But his risk period runs until then.

16 THE COURT: Well, just for terms of doing the  
17 expense side of the instance and expense test, you're  
18 saying it runs all that way out?

19 MR. KRUMHOLZ: Well, yes, because I think we --  
20 if we're going to look at the risk between the two of  
21 them, it's two different paragraphs; right? What  
22 Mr. Klamer has agreed is I'm going to pay all your  
23 costs, I'm going to have my own expenses, and I'm  
24 taking the risk that this is ultimately going to be  
25 sold to Milton Bradley and make enough money beyond

1 your cost and my cost that I'm going to make a profit.

2 THE COURT: But doesn't -- I don't mean to  
3 interrupt you.

4 MR. KRUMHOLZ: No, that's okay.

5 THE COURT: Doesn't that end, as far as at least  
6 Markham goes, doesn't that end when they license things  
7 to Milton Bradley?

8 MR. KRUMHOLZ: Well, for Mr. Markham it never  
9 began, so it can never end, because he was told at the  
10 outset that he would get his costs paid for.

11 THE COURT: That part I understand.

12 MR. KRUMHOLZ: Okay.

13 THE COURT: But in terms of, I mean I'm just  
14 trying to figure out, you know, the issue is the  
15 creation of the copyrightable thing, --

16 MR. KRUMHOLZ: Right.

17 THE COURT: -- and that seems to me that kind of  
18 runs from the point of when the, the running up to the  
19 point where the prototype is created up to an end point  
20 when it's handed off to Milton Bradley, they reach a  
21 license agreement and they're off and running.

22 MR. KRUMHOLZ: So I guess where I'm struggling a  
23 little bit, I totally get where you're coming from.

24 We've been trying to figure this out, too. I think we  
25 can talk about an abstract block of time for risk. You

1       were asking or I think what I interpreted you asking  
2       is, you know, Mr. Klamer's risk, Mr. Markham's risk.

3           If we talk about the abstract time of risk,  
4       there's no question when it begins. It begins when the  
5       first piece of work is done on the project, right,  
6       because there's work being done. We don't know the  
7       increments.

8           The abstract time when it ends, that's why I  
9       still say it's to, because we know we made some money  
10      with this \$5,000 advance, but not necessarily enough to  
11      cover everybody's cost. So it's mitigating the risk,  
12      but it hasn't eliminated the risk of profitability  
13      because I'm not making any profit; right?

14           THE COURT: Klamer did testify that I think he  
15      made -- this is your point, I guess -- that he made  
16      several trips back to Milton Bradley to consult with  
17      them as they were developing the production model --

18           MR. KRUMHOLZ: Right.

19           THE COURT: -- and some changes had to be made  
20      and whatnot; right?

21           MR. KRUMHOLZ: Right. I mean frankly we were  
22      tempted to go back to see how much it cost to fly TWA  
23      back in 1959. It was a lot more expensive, relatively  
24      speaking, than today. But we don't have it in the  
25      record. We know that there were costs. We don't know

1       the extent of those costs. But he bore the risk of  
2       profitability because until and unless enough games  
3       were sold, even with whatever little bit he got left of  
4       the advance, he still wasn't in the black. I mean  
5       that's --

6           THE COURT: Let me ask you this. I think I  
7       asked you this at the close of the evidence, but I want  
8       to make sure that I understand this. So if I decide  
9       that this was work made for hire and that both Israel  
10      and Chambers were work-for-hire for Markham and Markham  
11      was work-for-hire for Klamer, and it encompasses the  
12      whole copyrightable block, I mean that's really the end  
13      of the case, isn't it?

14           MR. KRUMHOLZ: Yes.

15           THE COURT: I mean there's no need to go through  
16      the -- I mean there's a need to analyze the documents  
17      with respect to that, to the relationship between  
18      Klamer and Markham, and they may have relevance to the  
19      question of whether it was work-for-hire. But if  
20      that's the conclusion, a lot of these factual disputes  
21      about who made what and, you know, did Markham create  
22      the whole thing, did he do the spinner, did  
23      Falco-Chambers and Israel do this piece or that piece,  
24      I mean it all doesn't matter.

25           MR. KRUMHOLZ: Right. That's a hundred percent

1       correct, and I'll try and put a fine point on that. If  
2       the Court concludes that the work done by Mr. Markham,  
3       Ms. Chambers and Mr. Israel was all done as a  
4       work-for-hire for Mr. Klamer, then we don't care who  
5       did what. It doesn't matter. Because if it's a  
6       work-for-hire, under 304(c) it's not subject to  
7       commission. So yes, you can answer that narrow  
8       question and then everything else falls off the table.

9                     THE COURT: Okay.

10                  MR. KRUMHOLZ: A couple of other points on the  
11       expense prong. They raised two points; one is the  
12       money paid out of a royalty advance, and the other,  
13       that there was a running royalty.

14                  On the royalty advance, I mean money is  
15       fungible. He could have paid that out of whatever, so  
16       I don't think the point really matters. But it also  
17       shows, you know, reflects a lack of understanding of  
18       the actual risk, because if the actual risk is not as  
19       of that day, it's when the work started, and who bore  
20       the risk at that time. So it's, to me, a red herring.

21                  As to the running royalty, we have cited some of  
22       the cases there, and I think we have others in our  
23       brief that make very clear that, yes, a running  
24       royalty, as you would expect, is one indicia that maybe  
25       there was a shared risk, right, because if you just

1 have a pure running royalty and you don't get paid but  
2 for the success of the product, sure, that's one factor  
3 that you need to look at. All of the cases say that  
4 that is not dispositive. And, more to the point, what  
5 those cases say, and we have cited them, is that if you  
6 have a running royalty and you agree to pay costs --  
7 which is something that Mr. Orbannes said is not  
8 atypical in this space, particularly when you have to  
9 get things done quickly.

10 If you agree to do both of those things, all the  
11 cases that we've seen support that the exception prong  
12 is satisfied because -- and again, it's pure logic;  
13 right? The fact that you decide to give them extra  
14 incentive because we need more creativity here or we  
15 need you to work faster is neither here nor there. The  
16 question is, you know, what risk did you take and if  
17 you were paid. If you're going to be paid regardless,  
18 then you didn't take risk. You start looking more like  
19 an employee. You start looking more like Ms. Chambers  
20 and Mr. Israel; I'm going to get paid for my time, I'm  
21 not taking the risk. Sure I'd like to make a lot more  
22 money and it's great that you're incentivizing me to do  
23 that, you know, work harder and faster, but gosh, I'm  
24 not going to get -- I am going to get paid here. So  
25 you don't then get rewarded with ownership on top of

1 that.

2 THE COURT: I think you're close to being out of  
3 time.

4 MR. KRUMHOLZ: I was afraid of that. So the  
5 express agreement -- maybe I'll get awarded little time  
6 for derivative after the break.

7 The express agreement -- I'll skip over  
8 collateral agreements. They make the point, well, they  
9 make two points. The first is this assignment  
10 agreement implies that Mr. Markham must have owned the  
11 rights in the first place because he's giving them  
12 away. Well, first of all, as we have on Slide 24, and  
13 I'm not going to read it for lack of time, but that has  
14 been, that concept has been expressly rejected by a  
15 number of courts, and we haven't seen a court that says  
16 to the contrary. I'm getting confirmation over there.

17 And again, it makes sense because these kinds of  
18 agreements are belt-and-suspenders agreements; whatever  
19 you got you're giving to me. But there's nothing here  
20 that tells us that he owned copyrights. There's  
21 nothing here that tells us that he owned trademarks.  
22 We don't know -- and this is kind of a standard  
23 agreement.

24 What they then point to is something that  
25 actually works against them. They point specifically

1 to Section 4 of the assignment agreement, which is a  
2 provision concerning application. It says, basically,  
3 upon the request of Link Research, Mr. Markham will  
4 apply for a copyright, a trademark, or patent. And  
5 then what they point to is later on they say if the  
6 agreement is terminated whatever they applied for goes  
7 back to Mr. Markham, and they say that's kind of the  
8 reversion, as it were.

9 But this provision only actually supports our  
10 position because they never asked for a copyright  
11 application from him. If anybody thought that a  
12 copyright application was necessary from him it would  
13 have been because he was the owner and the author, and  
14 they would have asked him to do it; but they never did.  
15 And we know that this provision was not ignored because  
16 they did ask him with regard to a patent and he did  
17 comply with regard to a patent. So all this really  
18 tells us is the opposite, really. It tells us it's one  
19 more indication that he did not believe and did not act  
20 like he was a copyright owner.

21 And this is what I talked about earlier, which  
22 is Mr. Markham acknowledging that he knew that  
23 copyrights were being applied for and did not act like  
24 a copyright owner by objecting.

25 And they point to this letter or letters back

1 and forth between Mr. Klamer and his lawyer about  
2 whether the prototype was copyrightable and say that  
3 that's some evidence of wrongdoing; but it's pretty  
4 ambiguous to me. But again, it's the opposite proof.  
5 It is Mr. Klamer acting like a copyright owner. He's  
6 out there paying his lawyer to find out whether there's  
7 a copyright right in this prototype. I doubt he was  
8 doing that out of the goodness for his heart for  
9 Mr. Markham. It's evidence as to what he believed at  
10 the time, which was he owned the prototype interest.  
11 And he did this before the assignment agreement, all  
12 right? So they can't even point to that.

13 And we have here two other letters, JTX37 and  
14 JTX23, over time of Mr. Klamer again acting like  
15 somebody who has a copyright interest. He's on  
16 Milton Bradley to make sure that they're doing their  
17 copyright notices correctly, that they're renewing  
18 properly. He's acting like the guy who has skin in  
19 this copyright game, and we see nothing like that from  
20 Mr. Markham.

21 Okay. What do I have left for time?

22 THE COURT: It depends how much Ms. Glaser is  
23 giving you. Let's go off the record.

24 (Discussion off the record)

25 MR. KRUMHOLZ: All right. So I will use that

1 time to talk about the derivative and independent  
2 works, and don't let me talk too fast because I could  
3 easily do that now.

4 So we do have agreements on the law. I will  
5 start out by saying I think there's a really  
6 problematic practice that went on here. They say it's  
7 our burden on derivative works.

8 Paragraph 83 of their amended complaint or third  
9 amended complaint, whatever it is, they asked for a  
10 declaratory judgment on derivative works as well, and  
11 then they put in no evidence. And then we put in  
12 evidence on our DJ request, and they say we have a  
13 burden. I'm not sure, frankly, how the Court sorts  
14 that all out, but it's just really inappropriate to not  
15 put in any evidence on something you asked the Court to  
16 do; we do it, and then say we have a burden. But  
17 that's an area of disagreement.

18 Areas of agreement is that termination does not  
19 apply to pre-termination derivative works. We agree on  
20 that. We agree that a derivative work is defined as  
21 one or more pre-existing works but adds new, original  
22 content. We agree that the degree of creativity in the  
23 original contract needs to be -- can be extremely low,  
24 and we agree that you need to look at both similarities  
25 and differences between the works when doing that

1 analysis.

2 Now, there was some discussion about this whole  
3 intervening works and whether we needed to look at  
4 everything in between. I guess I would make two  
5 observations. One I think is consistent with the  
6 observation you made, your Honor, which is it doesn't  
7 matter. I mean whether it was contributed, whether the  
8 particular material was contributed at that moment in  
9 time or some prior version, there's no dispute that  
10 Mr. Markham didn't play any role -- played no role in  
11 those prior versions. The only role he played would  
12 have been in the prototype, so where it came along the  
13 chain is irrelevant to the analysis from just a logic  
14 standpoint.

15 But also their position is consistent just with  
16 the language of the statute. 304(c)(6)(A) tells us  
17 that when we're trying to figure out if a work is  
18 derivative or not, we look to see whether it's based  
19 upon the copyrighted work covered by the terminated  
20 grant; right? So we have to go back, and this becomes  
21 our problem again of going back, figuring out what  
22 Mr. Markham physically created in the prototype, seeing  
23 if it's in whatever was deposited with the copyright  
24 office that we don't know, and seeing if there's enough  
25 similarity that it's based on the prior work, and

1 looking at the differences to see if there's enough new  
2 original work. I mean that's what the statute tells us  
3 to do. So I think either by logic or law you end up at  
4 the same place.

5 They have made the argument that by finding that  
6 the, I think the 1960 versions are derivative, that  
7 results in the loss of authorship for the original  
8 author. But that's just wrong as a matter of law. The  
9 authorship of the original work carries through into  
10 the derivative work and remains the same. There's no  
11 limit on that scope. The only difference is that  
12 there's a new author for whatever was original that was  
13 added, so it's not an argument that is correct in the  
14 law.

15 They also argue that if small changes result in  
16 the derivative work it will eviscerate the termination  
17 provision itself. I'm not even sure what they're  
18 asking of this Court. I mean the law is the law.  
19 Congress balanced and decided that derivative works are  
20 accepted. The standard for derivative work is clearly  
21 established in the law. I don't know if they're  
22 somehow asking the Court to apply a different standard,  
23 but if they are, I don't know what it is.

24 And the reality is Mr. Orbannes made clear in his  
25 testimony that small changes matter in this business.

1 They may not in other businesses, I don't know, but  
2 we're focused on the facts of this case.

3 So when we look at -- I'm not going to spend the  
4 time to go through all of these, but what we've  
5 attempted to do just for the Court's convenience is  
6 summarize the differences and the references in the  
7 record for those differences between the various  
8 versions that we asked the Court to look at.

9 We asked the Court to look at one 1960 version,  
10 and we see there that we have, you know, material  
11 differences. I think -- I'm not going to pretend that  
12 they are hugely different differences, but they are  
13 differences of an aesthetic nature, of a creative  
14 nature that were made to create a better product.

15 I mean you can't reasonably claim that the  
16 prototype as created was as aesthetically pleasing and  
17 therefore would result in the same amount of sales as  
18 the commercial version. They made changes that made  
19 it, in their view, better; and given that we're here  
20 60 years arguing about it, they were probably right.

21 The box cover, the same thing. You know, they  
22 used their expertise and experience to say, no, we  
23 don't want this shape; we want a different shape. We  
24 don't want the logo here; we want it over here. We  
25 don't want to just focus on the word "Life;" we want

1 "The Game of" to be prominent. These are all judgments  
2 that experienced people make to improve the chances of  
3 success, and it makes it a derivative work.

4 The same with the rules. The rules, frankly, we  
5 were going to say is a completely independent work  
6 because they're so different, but at a minimum they're  
7 clearly derivative works; I mean just the images  
8 themselves. You don't even have to get into any of the  
9 words. But the words, basically they did a nice job,  
10 as Mr. Orbannes talked about, with their kind of  
11 introductory language, and Milton Bradley kept some of  
12 their introductory language, so we can call it a  
13 derivative work, and that's what Mr. Orbannes testified  
14 to. But the differences are material, as we highlight  
15 there.

16 And this is the testimony that I was talking  
17 about from Mr. Orbannes about whether these, you know,  
18 incremental changes matter, and he testified that these  
19 small changes and modifications, as he says, have an  
20 overwhelming impact at times. You know, paraphrasing,  
21 these are the kinds of changes that are a difference  
22 between having a successful product and not having a  
23 successful product.

24 And I don't know if the Court remembers this,  
25 but Mr. Carty, on direct, tried to claim that all of

1       these changes were economic or cost motivated; except  
2       at his deposition he had admitted the opposite, that  
3       these were aesthetic changes and in fact there  
4       typically are aesthetic changes like this made. He  
5       completely flipped from his direct examination and  
6       acknowledged the truth of the matter, which that these  
7       changes are aesthetic changes. And Mr. Orbannes, of  
8       course, confirmed that as well.

9           And Ms. Ross herself, and these are just some of  
10      them. We don't even have the color sync here. But  
11      Ms. Ross herself, when Ms. Batliner brought a  
12      commercial version of the Game, acknowledged 60 years  
13      later that it was different than the prototype that she  
14      looked at. So the changes were enough that 60 years  
15      later she can tell there were differences.

16           Oh, and this shows up in their brief, and  
17      Mr. Pollaro made a little reference to this in his  
18      argument. This is a portion of a letter from  
19      Mr. Markham to Mr. Taft at Milton Bradley, and it's the  
20      so-called "faithful interpretation" letter, and in that  
21      last sentence he says, "And I concur. The over-all  
22      product is a most faithful interpretation of our  
23      mock-up."

24           Well, I would submit if you use the word  
25      "interpretation" you're impliedly saying that there's

1 creative input. It doesn't say a faithful  
2 reproduction. It says "faithful interpretation." So  
3 in our view this document only supports the proposition  
4 that creative and material changes were made.

5 You know, I will go really fast through the new  
6 version. So what we've been calling the new version is  
7 the version presently being sold. And we also looked  
8 at a representative third party branded Despicable Me  
9 version. And I have to say I don't even need to spend  
10 much time because they are so different that I don't  
11 know how you can credibly say that they're, frankly,  
12 not independent works.

13 And this really kind of goes to where they don't  
14 understand that they're in a copyright case. You know,  
15 what they keep coming back to and saying is look, they  
16 both have spinners. I know they both have spinners.  
17 But the spinners are expressed differently; right?  
18 Using a spinner is an idea, a good one, a really good  
19 one, but it's an idea. Oh, look, they both have  
20 circuitous tracks. Yeah, circuitous tracks existed  
21 before The Game of Life, they'll exist -- I don't know  
22 when the end of The Game of Life is, but it will  
23 presumably exist, if such a thing exists, afterward.  
24 But that's an idea. That's not an expression. How you  
25 do the circuitous track is what matters. There's no

1       3-D components on here at all. There's no text on the  
2       tracks at all. I mean I could spend an hour-and-a-half  
3       going through the differences, but the only  
4       similarities are ideas.

5           And here are some of the differences that I was  
6       just talking about. The cover, I mean here's where  
7       we're at with these guys. They're saying that an  
8       overlap is the use of the trademark The Game of Life.  
9       It's not a trademark case. They don't get credit for  
10      the fact that Hasbro came up with The Game of Life and  
11      is using it, you know, with the trademark. Everything  
12      here is different. The only thing that is the same is  
13      the franchise and the trademark, The Game of Life.

14           And here's the Rules. If we go back -- well,  
15      I'm not going to use my little time left trying to find  
16      that. But these rules look radically different in  
17      every respect from the rules that were associated with  
18      the prototype.

19           Despicable Me, I mean, again, yes, we have a  
20      spinner. Yes, the -- well, I don't even know if the  
21      track would even be considered circuitous at that  
22      point, but even if I concede that, the expressions are  
23      fundamentally different. I mean it doesn't really  
24      matter legally whether it's a derivative work or  
25      independent work because we keep getting to do it, but

1 I think it does matter in this sense. If the Court  
2 gets to this part of the case -- which, as we talked  
3 about, it doesn't necessarily need to -- the reason we  
4 did this is because we would want some guidance. I  
5 mean if the Court thinks this is derivative, that  
6 affects how we make the next game or the next version  
7 because, you know, we're going to make more versions.

8 In our view, you know, this is so different that  
9 it has to be viewed as independent, and we would need  
10 -- we would ask, it's not our position to tell you what  
11 we need, but we would ask that the Court give us some  
12 guidance that this indeed is an independent work so  
13 that we can understand going forward that we can do;  
14 you know, it just gives us some guidance as to what  
15 later versions should look like. The same with the  
16 cover.

17 THE COURT: Okay. I think I'm going cut you off  
18 there. So let's just take a very short break and we'll  
19 come back and we'll have Ms. Glaser, and then  
20 Mr. Pollaro will have his rebuttal.

21 (Recess)

22 THE COURT: Ms. Glaser.

23 MS. GLASER: May I proceed.

24 THE COURT: You may.

25 MS. GLASER: Good afternoon, your Honor. I just

1 want to make a few points because my very able  
2 co-counsel, counsel for Hasbro, has done an excellent  
3 job dealing with many of the issues.

4 Your Honor, credit which has generally been  
5 given to Mr. Markham does not equate to copyright  
6 ownership, which is not true of Mr. Markham and to  
7 which Mr. Markham is not entitled.

8 This case is not -- it's about a lot of things,  
9 but it's not about restoring Mr. Markham's legacy.  
10 Ruben Klamer has consistently recognized Markham's  
11 contributions to the creation of The Game of Life for  
12 60 years, starting when he asked Milton Bradley to  
13 credit Markham on the box cover as the Game's designer,  
14 and that's in Ruben Klamer's supplemental post-trial  
15 proposed findings of fact, your Honor, at  
16 paragraph 111.

17 Instead, this case boils down to the greed of  
18 Mr. Markham's second wife, Lorraine Markham, married to  
19 him for a year before he passed away and her, in our  
20 view, very transparent attempt to bring more money from  
21 a relationship that has already been highly  
22 remunerative for her and all the parties involved.

23 To say that Mr. Markham was not the copyright  
24 author of this game doesn't tarnish his legacy even  
25 slightly; rather, it accurately states the nature of

1 his contribution to the game under the copyright act of  
2 1909 and controlling case law. Plaintiffs attempts to  
3 prove otherwise, in addition to being unsupported by  
4 evidence, are nothing more in our view than a cash grab  
5 and an attempt to wrongfully steal credit from  
6 Mr. Klamer and diminish his contributions to and his  
7 financial interest in the Game.

8 Just as an aside, because we've been talking  
9 about this little spinner a couple of times this  
10 morning earlier today, I direct your Honor to  
11 Footnote 4 of our post-trial reply brief where it's  
12 quoting Mr. Klamer's testimony. The spinner, this  
13 famous spinner comes from The Checkered Game of Life.  
14 It doesn't come from Mr. Markham. It came -- it was  
15 picked up and lifted from the prior Checkered Game of  
16 Life, and there's no testimony to the contrary.

17 I want to talk about the First Circuit, not  
18 always a comfort area for me because I'm from the  
19 Ninth Circuit, but I will tell you that I've read the  
20 cases and tried to be as informed as I could be,  
21 knowing I'm in front of a First Circuit and not a  
22 Ninth Circuit judge. And I'm quoting from the  
23 *Forward v. Thorogood* case, 1993. This is after the  
24 case that Plaintiffs cite for their authority, and I'm  
25 quoting: "Although initially confined to the

1 traditional employer-employee relationship, the  
2 doctrine" -- that's the work-for-hire doctrine -- "has  
3 been expanded to include commissioned works created by  
4 independent contractors, with courts treating the  
5 contractor as an employee and creating a presumption of  
6 copyright ownership in the commissioning party at whose  
7 "instance and expense" the work was done."

8 That's the law in the First Circuit as we  
9 understand it, your Honor.

10 I don't know if your Honor has our PowerPoint,  
11 but we have a set for you and that happened to be, that  
12 particular cite is at page 15 of our PowerPoint.

13 THE COURT: I don't have that.

14 MS. GLASER: It's right there.

15 THE COURT: Thank you.

16 MS. GLASER: Under the instance and expense  
17 test, a court will presume copyright ownership in the  
18 commissioning party where instance and expense are both  
19 proven. Defendants have shown that the development of  
20 the prototype game by Markham and his employees was  
21 done at the instance and expense of Link.

22 The instance portion of the test examines  
23 whether the commissioning party was a motivating  
24 factor. That's the law. Behind the creation of the  
25 work, Plaintiffs appear to have conceded that the Game

1       was developed at Klamer's instance, in their post-trial  
2       briefs. The evidence supports such a finding as well.  
3       All the testimony has shown that Mr. Klamer brought the  
4       project to Mr. Markham on behalf of Link and not the  
5       other way around.

6                  Your Honor, may I approach my little timeline.  
7       I would just like to go through it, some of which --

8                  THE COURT: Actually I'll get you a microphone  
9       to use so everybody can hear you. We've got a  
10      portable.

11                 (Pause)

12                 MS. GLASER: I think I can keep my voice up.

13                 THE COURT: It's important to get it on the  
14      digital recording.

15                 MS. GLASER: Sorry. Am I digital?

16                 THE COURT: You're good.

17                 MS. GLASER: I'm going to try not to put my back  
18      to your Honor. What we did here is, and some of which  
19      has been repeated by your Honor this morning, we start  
20      with Mr. Klamer visiting Milton Bradley and is asked to  
21      create a hundredth anniversary product. Mr. Klamer  
22      sees The Checkered Game of Life in the Bradley archives  
23      and is inspired by the term "Life." He pens notes for  
24      a family board name, The Game of Life, and considers  
25      hiring Bill Markham, among others.

1           Then you have Mr. Klamer hiring Mr. Markham and  
2 his employees on behalf Link on a work-for-hire basis  
3 to begin work on the prototype of The Game of Life. In  
4 July -- August of '59, Mr. Klamer oversees and directs  
5 all work performed by Bill Markham and his employees on  
6 the prototype, The Game of Life, including its  
7 packaging and instructions.

8           Mr. Klamer submits a prototype of The Game of  
9 Life to Milton Bradley in August of '59. A little  
10 later in August Milton Bradley asked Mr. Klamer to make  
11 changes to the prototype of The Game of Life to make  
12 its production commercially feasible.

13           Mr. Klamer visits Milton Bradley to help  
14 substantially redesign. They haven't made a decision  
15 yet to go forward. He goes back to Milton Bradley to  
16 help substantially resign the three-dimensionality,  
17 the track, the spinner, and other elements of the Game.  
18 In September of '59 there's a '59 license agreement  
19 between Link and Milton Bradley.

20           The '59 agreement between -- that's in October  
21 of '59. And the '59 agreement between Link and Bill  
22 Mr. Markham, doing business as California Product  
23 Development. And then in March of 1960 The Game of  
24 Life is first published noting Link as the copyright  
25 holder on the cover.

1           In December of 1960 copyright registrations  
2 issue for The Game of Life cover as to Link, and the  
3 board game and instructions as to Milton Bradley.

4           From 1960 to 1988 we go forward, everything is  
5 operating as it's supposed to. In 1988 there's a  
6 copyright registration renewal issued for The Game of  
7 Life cover, game board, instructions, listing Milton  
8 Bradley as the proprietor of a copyright in a work made  
9 for hire; and on July 9, 1989 there's a settlement  
10 agreement entered into materially altering  
11 Mr. Markham's royalty interest and setting up an escrow  
12 account. It goes up; it doesn't go down.

13          Another factor that courts examine when  
14 determining whether a work was created at a party's  
15 instance is the extent to which the party had the right  
16 to control or supervise the artist's work. All the  
17 testimony supports a finding that Mr. Klamer is the one  
18 who controlled and supervised the development of the  
19 prototype game, not Mr. Markham. Ms. Israel (sic)  
20 testified that it was as if Klamer worked at Markham's  
21 studios, he was there so much, and Chambers said that  
22 Klamer visited twice a week during the development  
23 period to check in on their progress and suggest  
24 changes or modifications. If you look at slide --  
25 that's on Slides 17 and 18.

1           If you look at Slide 19, Chambers and Israel  
2 both testified that they considered Klamer to be the  
3 client and that Klamer had the final say over changes  
4 made to the prototype, including when it was ready to  
5 be shown to Milton Bradley.

6           If you go to Slides 20 through 23, your Honor,  
7 the expense portion, which has been covered in large  
8 part by other counsel, so I'll try to be brief. The  
9 expense portion of the instance and expense test looks  
10 at who paid for the work. Here the evidence is crystal  
11 clear Mr. Klamer promised Mr. Markham that he would  
12 reimburse him for all the costs he incurred in  
13 developing the prototype game, and Mr. Markham invoiced  
14 Link for those costs, and Link paid that invoice. The  
15 Game was created at Link's instance and expense.

16           If you go to 24, Slide 24, ample case law states  
17 that work-for-hire can arise where one is paid a  
18 royalty. Here, because Markham's costs were already  
19 covered by Link, he didn't bear any risk. In fact,  
20 because Markham also received an advance against future  
21 royalties, Mr. Markham came out ahead. He would and  
22 did make a profit whether the Game sold a million  
23 copies or it sold zero.

24           And then the invoice also shows that Mr. Klamer,  
25 on behalf of Link, agreed to pay all of Markham's costs

1 before Link ever received any advance from Milton  
2 Bradley. Link would have been on the hook for  
3 Markham's costs whether the Game was a success or it  
4 was a failure.

5 And there's nothing -- this 1959 agreement has  
6 been raised by just about everybody. There's nothing  
7 in the '59 agreement that indicates the parties -- and  
8 I urge you to look at Slide 32, your Honor. There's  
9 nothing that indicates that the parties didn't intend  
10 to create a work-for-hire.

11 Plaintiffs have claimed that oh, my gosh, look  
12 at Section 4 of the agreement, and that's an express,  
13 they say, an express reservation of copyrights in  
14 Markham. That's rubbish, hogwash; legal terms.  
15 Section 4 doesn't contemplate any existing copyrights  
16 reverting to Markham. It provides for certain  
17 intellectual property rights to revert to Markham if he  
18 were to pursue them at Link's request.

19 I'd like you to go, if you would, to Slide 33,  
20 and I'd like to approach one more time with not  
21 spending very much time.

22 THE COURT: Sure.

23 MS. GLASER: All we're trying to do here is show  
24 what the evidence demonstrated is the legal  
25 relationship of the parties. You start at the bottom,

1 and this is based on 17 USC 203(a) and 304(c), which  
2 are copyrights created as works made for hire are not  
3 subject to termination.

4 So if you start at the bottom, Ms. Chambers and  
5 Mr. Israel are works-for-hire for Bill Markham.  
6 They're employees. That's Bill Markham also doing  
7 business as California Product Development.

8 The next arrow up is a work-for-hire that  
9 Markham is acting as a work-for-hire, Markham and his  
10 company, California Product Development, is a  
11 work-for-hire for Mr. Klamer, Link Research and  
12 Development.

13 And then you go up the next level, and they are  
14 the licensor, Klamer and Link, to Milton Bradley and  
15 Hasbro, the licensee. That is what the evidence  
16 establishes in our view, you Honor, of the legal  
17 relationship of the parties.

18 I think if you look at Slide 33 and 34 you'll  
19 see that the work-for-hire doctrine applies to work  
20 created by employees acting within the scope of their  
21 employment. The evidence has shown that all the  
22 physical work, all of the physical work of creating a  
23 Game of Life prototype was done by Chambers and Israel.  
24 There's no evidence, I have to say there's not just  
25 evidence -- your Honor asked a couple of questions

1       about, well, is there some sort of creation moment when  
2       you put that last I guess piece of a building on the  
3       prototype game. There is not one iota of evidence, to  
4       my recollection, and I'll stand corrected if I'm wrong,  
5       that Mr. Markham created, actually put that piece on  
6       that had anything to do with the actual physical  
7       creation of the prototype. This is not just a posse of  
8       evidence; there's no evidence.

9               Now, we know that Ms. Chambers and Mr. Israel  
10      were both full-time employees of Mr. Markham and  
11      California Product Development at the time they worked  
12      on the Game. Both were paid a salary and their  
13      paychecks came from California Product Development,  
14      not from Mr. Markham personally, and they were both  
15      employed as artists. In fact, they were the only  
16      full-time artists employed by California Product  
17      Development. That's the evidence.

18               Now, all these contributions for Chambers  
19      designing and building the gameboard and for Israel  
20      doing the box cover, for which they were very  
21      rightfully proud, falls squarely within the scope of  
22      their employment. And this District Court, and I'm  
23      going to mispronounce this so I apologize, held in the  
24      *Foraste v. Brown University*, that the copyrights to  
25      works prepared by an employee in the scope of his or

1       her employment are owned by the employer on a  
2       work-for-hire basis.

3           What does all this mean? And I'm about to sit  
4       down. Even if Klamer and Link weren't involved at all,  
5       Plaintiffs still would not be able to terminate any  
6       great grant of copyrights that Markham owned by virtue  
7       of employing Chambers and Israel. That's because  
8       works-for-hire are exempted from the termination  
9       provisions of the 1976 Act whether the works are made  
10      for or by the purported terminating party. In short,  
11      our board, Plaintiffs have a double work-for-hire  
12      problem and cannot under any circumstances, in our  
13      view, terminate any copyrights in or to the Game.

14           Thank you, your Honor.

15           THE COURT: Thank you. Ms. Glaser.

16           All right. So before Mr. Pollaro gives his  
17      rebuttal, I have one more question for Mr. Krumholz.  
18      It's kind of a weird question. I don't think it  
19      probably matters at all, but it just occurs to me it's  
20      something I'm curious about. Given that The Game of  
21      Life was at least inspired by and maybe even a kind of  
22      copy of The Checkered Game of Life, what was the status  
23      of The Checkered Game of Life from a copyright point of  
24      view in 1960? It was a hundred years old at that time.  
25      But my recollection is there are a lot of similarities

1       between The Checkered Game of Life and the knew game.

2           MR. KRUMHOLZ: I think the evidence as it stands  
3       is it was inspired, but not similar to.

4           THE COURT: Use the microphone.

5           MR. KRUMHOLZ: I'm sorry. So the evidence,  
6       which comes primarily from Mr. Klamer on this, is that  
7       he went in and saw the name and was inspired to come up  
8       with the ideas based on the name. But the physical  
9       games are very different. So the copyright would have  
10      expired regardless, but I would surmise that there  
11      would have been not enough similarity in the physical  
12      game to say that one was derived from the other even on  
13      a copyright basis. I think it was literally a  
14      checker-type, you know, based on a checker, a  
15      checkerboard.

16           THE COURT: A checkerboard. Okay.

17           MR. KRUMHOLZ: Oh, look at that.

18           THE COURT: I think there was some evidence of  
19      it, wasn't there?

20           MS. GLASER: It's in the record.

21           MR. KRUMHOLZ: Yes. As a matter of curiosity do  
22      you want to see it, your Honor?

23           THE COURT: No. I just remember there being  
24      some evidence.

25           MR. KRUMHOLZ: Could I at least see if my

1 description is correct?

2 THE COURT: Yes.

3 (Pause)

4 MR. KRUMHOLZ: Yes, I am now comfortable in my  
5 description. It's a checkerboard, essentially, so it  
6 was more the name inspired it than the physical game.

7 THE COURT: Doesn't that also have stages of  
8 life in it and life events? Wasn't that part of it?

9 MR. KRUMHOLZ: I don't know if that -- I don't  
10 know that we know that, I guess, is what I would say.

11 THE COURT: Okay. Maybe I'm imagining that.  
12 All right.

13 MR. POLLARO: It was partly that; I mean it had  
14 virtue, and virtues were part of it as well.

15 MR. KRUMHOLZ: I think that's right. I think it  
16 was more of that kind of thing than stages in life.

17 THE COURT: Well, okay. I told you it was kind  
18 of a weird question.

19 All right. Let's get back to Mr. Pollaro.

20 MR. POLLARO: Thank you, your Honor. While  
21 we're talking about The Checkered Game of Life, I  
22 wasn't planning on putting that very high on the list,  
23 but that game had a tee total; nothing like a spinner,  
24 and it certainly wasn't part of the board game. So  
25 Ms. Glaser mentioned that, so I'll just start with

1 that.

2 So I do want to just knock out a few of these  
3 real quick. I think one of the ones I want to do very  
4 quickly is this expense issue. I'm looking at Slide 21  
5 of Mr. Krumholz's presentation. I don't know if you  
6 have that available.

7 THE COURT: I do.

8 MR. POLLARO: And before I get to my point, I do  
9 just want to say there's no evidence of this so-called  
10 unconditional promise and, second off, if you look at  
11 the law there under *Siege1*, the unconditional promise,  
12 if there were one -- I have no idea if they're seeking  
13 to enforce an oral agreement or what -- it's related to  
14 the gameboard, and under *Siege1*, again, that's  
15 irrelevant. We're talking about who is bearing the  
16 risk of the work's profitability, and you see the  
17 language there. We're not talking about the  
18 typewriter, the pencils, the paper, anything like that.  
19 We're talking about who is bearing the risk of the  
20 success and profitability of this enterprise, and so  
21 let me grab my --

22 THE COURT: I just don't understand how, on what  
23 basis you can say Markham bore the risk, as opposed to  
24 Klamer. Klamer had a \$5,000 up-front royalty payment  
25 advance on royalties; right? And Markham billed

1 Klamer, and Markham was obligated to pay whatever he  
2 billed him. Now, it came up under \$5,000 for sure, but  
3 I don't see -- if Markham's company is getting paid for  
4 all the work that they're doing, I don't understand how  
5 they're bearing any risk.

6 MR. POLLARO: Your Honor, it doesn't -- quite  
7 frankly, it's irrelevant, and I think I mentioned that  
8 before. I think --

9 THE COURT: You said it was Milton Bradley  
10 that's bearing the risk.

11 MR. POLLARO: And I said kind of as an aside  
12 Bill Markham actually paid for it. It doesn't matter.  
13 That's not the analysis. You can throw Bill Markham  
14 out; it doesn't matter. So let's just ignore Bill  
15 Markham for a second and let's focus on the law under  
16 *the Siegel* case, and you have to look at who, the focus  
17 is on who -- and I'm reading now -- the focus is on who  
18 bore the risk of the work's profitability. So we're  
19 not talking about the work itself, so let's just forget  
20 that for now. We're talking about the profitability of  
21 the work, what's going to happen, who's publishing it.  
22 Again, that's what this is all about. And so the  
23 pencils, the paper, the prototype, doesn't matter.

24 And so for the expense prong, Bill Markham's  
25 name doesn't come up. And so we agree with the law,

1 it's in I assume Hasbro's --

2 THE COURT: Why isn't Klamer bearing the risk?  
3 I don't understand.

4 MR. POLLARO: Okay, your Honor. I mean I'm  
5 focusing on *Siegel* right now because they're talking  
6 about the expense of the prototype, and *Siegel* is  
7 telling you that doesn't matter, that's superficial.  
8 What we're talking about is why are you even entering  
9 into this business? What are you doing with that  
10 quote/unquote work? What are you going to do with that  
11 prototype? You're going to publish it, and you're  
12 going to sell it, and you're going to manufacture it,  
13 and you're going to try to make money. Who is bearing  
14 that risk? That's what *Siegel* tells us.

15 THE COURT: Well, more than -- this is in the  
16 context of copyright. Milton Bradley doesn't have any  
17 skin in the game here until it licenses the Game and  
18 then decides to produce it; right?

19 MR. POLLARO: Exactly. And obviously, based on  
20 the timeline, I'm sure you're familiar by now, your  
21 Honor, is that happened before the assignment agreement  
22 with Bill Markham.

23 THE COURT: Okay. But I mean so who bore the  
24 risk of the works profitability? Break that down.

25 MR. POLLARO: Milton Bradley.

1           THE COURT: Well, the work is the thing that's  
2 copyrightable, and that has to be the creation, the  
3 prototype. That's what you're saying; right?

4           MR. POLLARO: That's not what I'm saying at all.

5           THE COURT: Okay. Explain it to me.

6           MR. POLLARO: *Siegel* says you don't worry about  
7 the actual prototype. We'll use our terms. It's  
8 saying here the focus is not on the cost or expense in  
9 physically creating the work itself.

10          The work itself in this case is the prototype.  
11 *Siegel* is telling us don't worry about that.

12          THE COURT: Okay.

13          MR. POLLARO: Don't worry about that. Worry  
14 about the next step. Who is going to manufacture it?  
15 Who is going to publish? Who is going to have to hire  
16 workers on the assembly line? Who is going to have to,  
17 you know, buy space on shelves or whatever, however  
18 that process works. That's what *Siegel* is telling us,  
19 and that's the law, and that's correct.

20          THE COURT: Well, if that's what it meant, then  
21 wouldn't there be a comma and say if somebody decides  
22 to commercially produce the work?

23          MR. POLLARO: Again, we're in copyright law.  
24 Under 1909 you don't get copyrights without publishing.  
25 And again I'll address that issue that Mr. Krumholz has

1       repeatedly mentioned, that you can get copyright  
2       registration or protection --

3           THE COURT: Under your theory there could be no  
4       work-for-hire for anything prior to the commercial  
5       publication of the work; correct?

6           MR. POLLARO: That's not true at all. That's  
7       not true at all.

8           THE COURT: Okay. Well, then just let's assume  
9       that Milton Bradley decided not to buy the Game, --

10          MR. POLLARO: Okay.

11          THE COURT: -- all right? So there would still  
12       be, I think there would still be a work, wouldn't  
13       there, a work that was copyrightable; right?

14          MR. POLLARO: That's correct.

15          THE COURT: Okay. And it turns out to be not a  
16       very profitable work because nobody is going to produce  
17       it; right?

18          MR. POLLARO: Okay. I'm following your  
19       hypothetical.

20          THE COURT: Okay. So at least theoretically  
21       that could be done on a work-for-hire basis. Somebody  
22       in that relationship had to bear the risk. It's  
23       either, in this case it's either Klamer or Markham bore  
24       the risk, because Milton Bradley decides not to even  
25       get into this.

1                   MR. POLLARO: I understand your hypothetical,  
2 but that's certainly not our facts, and you're talking  
3 about a different scenario there. Basically what it  
4 sounds like you're doing is you're talking about an  
5 agent that maybe just acquires products and then at  
6 their own expense goes and figures out what to do with  
7 them, maybe they sell them, maybe they don't. That's  
8 not even close to what happened here. That's not even  
9 remotely close to what happened here.

10                  THE COURT: No, but I'm trying to break this  
11 down. It seems to me that you could have more than one  
12 entity that bears the risk of a works, a copyrightable  
13 works profitability, and on a kind of spectrum of time  
14 that the person bearing the risk could be the person  
15 that's trying to get the product to market; and then at  
16 the point where a company says hey, I'll buy that and  
17 I'll produce it, now they're going to bear the risk  
18 because they may produce it and incur a lot of costs in  
19 doing so and not make money.

20                  MR. POLLARO: I hear what you're saying, your  
21 Honor, and there's a couple of problems with that.  
22 First of all, the whole point of this instance and  
23 expense test is to determine the employer. You can't  
24 have multiple parties, so that's out. That's basically  
25 what they're doing. And, quite frankly, Mr. Krumholz

1       started by saying yeah, we wanted to prove it was  
2       work-for-hire for Hasbro, but we didn't think we had  
3       the evidence and so Plan B was Link. That's exactly  
4       the issue. They had to make a choice between do we go  
5       with Milton Bradley, who we can't prove had any  
6       control, or do we go with Link who had the control but  
7       didn't have the expense. That's exactly what happened,  
8       which is why they went to this new work-for-hire.  
9       That's exactly what happened.

10           But back to your question. I think, I think, as  
11          I understand it, the distinction is simply if I'm Ruben  
12          Klamer, let's say, and I'm acquiring products from  
13          creators like Bill Markham and I'm acquiring them to  
14          sit in my warehouse and I'm going to bear that expense,  
15          then that's a work-for-hire. If I just say listen, you  
16          know, give it to me, don't worry about it, I'll sort it  
17          out, you go your separate way -- because that's really  
18          what effectively what a work-for-hire is; right?  
19          There's no ongoing relationship. I've paid you, you  
20          give me this thing, and we don't even have to see each  
21          other again. That's it.

22           But the situation here is Ruben Klamer is that  
23          middleman. He's the guy with the contacts in the  
24          industry. And so what he's doing is he is not saying  
25          Bill Markham, I will pay you prototype no matter what,

1 if I don't get any money. He's saying listen, I'm  
2 going to find a publisher. If I find a publisher, you,  
3 we'll reimburse you for your costs and we'll go from  
4 there. And that's what the case law says. So I don't  
5 know if that --

6 THE COURT: So maybe I've missed something in  
7 the evidence. You're saying that the deal between  
8 Klamer and Markham was that Klamer only had to pay  
9 Markham's expenses if Milton Bradley or somebody else  
10 bought the Game? I didn't think that that was --

11 MR. POLLARO: Quite frankly there is no evidence  
12 that there was an agreement before, so all we have is  
13 the license agreement and the assignment agreement and  
14 that license, and we obviously know what those say.

15 THE COURT: Well, we have some evidence. I mean  
16 Klamer at least testified he hired Markham. There's  
17 some evidence that they, in fact, they had a business  
18 relationship, a historic relationship and their  
19 relationship as to this product, and he billed them  
20 and -- Markham billed Klamer, and Klamer paid the  
21 invoice. I mean that's all evidence; right?

22 I mean I guess what I'm asking is where is the  
23 evidence that says that they had an understanding that  
24 Markham wouldn't have to or -- I'm sorry -- that Klamer  
25 wouldn't have to pay Markham for the work that

1       Markham's company did unless and until Milton Bradley  
2       or somebody else bought the game? Is there any  
3       evidence in the record of that?

4            MR. POLLARO: No, there's no evidence of an  
5       unconditional promise to pay at all, and so I would say  
6       there's no evidence of the scenario that you're talking  
7       about as well.

8            THE COURT: Okay. All right. So the evidence  
9       is pretty much what I described.

10          MR. POLLARO: I'm not sure I understand, but  
11       I'll move on.

12          But I do want to direct the Court's attention to  
13       Tab 1 in the Markham parties' binder. It should have a  
14       blue cover.

15          THE COURT: In the evidence that you handed up?

16          MR. POLLARO: Yes.

17          THE COURT: Okay. I have it.

18          MR. POLLARO: And if you turn to -- I'm looking  
19       at the license agreement. If you'd turn to, it looks  
20       like JTX4, 001-004.

21          THE COURT: Okay.

22          MR. POLLARO: In the middle of the page there's  
23       a section there (3), Manufacture, and I'll just read it  
24       briefly as it's relatively short: "Licensee agrees  
25       that it will develop, manufacture, sell, exploit and

1 distribute "The Game of Life" in a diligent,  
2 businesslike and aggressive manner, at no expense to  
3 Link."

4 That's what Siegel is talking about. That's  
5 exactly what Siegel is talking about.

6 THE COURT: Okay.

7 MR. POLLARO: And I'll mention, too, as well,  
8 which may explain how Hasbro was able to turn the  
9 license into an assignment. The agreement also  
10 contemplates that Milton Bradley will pay for all the  
11 expenses and file any copyrights. So they did that  
12 themselves.

13 And make no mistake about it; that's exactly  
14 what Hasbro argued today, that by saying that the  
15 copyrights that list Hasbro as the owner are somehow  
16 correct violates this license agreement. They have  
17 nothing but a license agreement, and so I didn't hear  
18 an explanation about how that's okay.

19 I do want to touch on one very important point,  
20 and it has to do with this idea that ideas aren't  
21 protectable. I think we're all in agreement that  
22 that's the case, and in fact that is what patents do.  
23 Patents protect ideas. So I think I used this analogy  
24 many months ago when we were arguing the summary  
25 judgment motions, motions to dismiss; that you and I

1       don't have to create anything to have a patent  
2       together, we can just combine ideas and put our ideas  
3       down and file a patent, and you and I would have a  
4       patent.

5                  That's not the way copyright works. Copyright,  
6       as we've been talking about all day, is about the  
7       creation. And so what Mr. Krumholz told you was that  
8       Chasen's, you know, the moment that the prototype was  
9       created doesn't matter, you know, if anything it's just  
10      Markham doing the rote translation of his work of his  
11      employees; right? That's basically the argument made,  
12      that Markham didn't -- just because he's doing the  
13      final creating, it's really the expressions from the  
14      other people. And honestly, they've just made the case  
15      that the patent, by pointing out the patent that  
16      identifies Ruben Klamer and Bill Markham, they've just  
17      now told the world that Ruben Klamer apparently was  
18      involved in this process, that Leonard and Grace had no  
19      ideas, no ideas at all; it was Bill Markham and Ruben  
20      Klamer.

21                  So again, going back to the authorship  
22      discussion that we had this morning, that rules out  
23      everybody else but Bill Markham.

24                  THE COURT: But Israel and Chambers were  
25      employees. There's no dispute about that, is there?

1 MR. POLLARO: Your Honor --

2 THE COURT: So even if they did have ideas, they  
3 belonged to, essentially belonged to Markham, don't  
4 they?

5 MR. POLLARO: Absolutely not, your Honor, and  
6 there's a rather large dispute about whether or not  
7 they were employees. I'm reading from Ruben Klamer's  
8 deposition in this case: Question -- actually I'll  
9 give you -- I don't have the exhibit number. I'll just  
10 give you the page number and then we can figure out  
11 what the exhibit number is. It's Ruben Klamer,  
12 May 2nd, page 25 -- I'm sorry -- 44 line 25, to 45  
13 line 5:

14 "Question: You don't know whether those two  
15 individuals were employees or independent contractors  
16 for Mr. Markham, do you?"

17 "Independent contractors."

18 "Why do you say that?"

19 "That's what I thought they did."

20 But yet Ruben Klamer is saying he's an  
21 independent contractor. You've got Ruben Klamer  
22 seeking an assignment --

23 THE COURT: Well, that's what Mr. Klamer thought  
24 Israel and Chambers were. But Israel and Chambers both  
25 said they were employees; right?

1                   MR. POLLARO: The inconsistencies go on and on  
2 and on, I get that, your Honor.

3                   The point I'm trying to make is, going back to  
4 our conversation this morning about Mr. Klamer seeking  
5 Bill Markham's assignments; right? His assignment. He  
6 didn't seek an assignment from Leonard or Grace.

7                   THE COURT: Right. But I mean as Mr. Krumholz  
8 pointed out, why would he? If they're employees --

9                   MR. POLLARO: They're not employees. That  
10 exactly counters his entire argument. Ruben Klamer  
11 thought they were independent contractors. And under  
12 their version of the law, independent contractors may  
13 or may not have their own rights. That's exactly why  
14 he should have sought the rights of Leonard and Grace.  
15 That's precisely why he should have asked for not just  
16 Bill Markham's, Leonard and Grace's, if their version  
17 of events is accurate. That's precisely the situation.

18                   THE COURT: Okay. So even if I give you credit  
19 for that, what that gets you is that he didn't ask for  
20 it; right? I mean, so he didn't ask for that. I mean  
21 I guess so what? There's sort of a big so what there.

22                   MR. POLLARO: It's just that the -- well, it's  
23 the same situation that we started with. They have to  
24 explain away, they have to explain why all the conduct  
25 and all the actions that transpired for many years

1 isn't right; and why the assignment says, you know,  
2 Bill Markham, you did this, and the '65 exchange. They  
3 have to explain. You know, Bill Markham is a bully  
4 somehow? There's nothing in the record on that. By  
5 all accounts he was a saint, always had a smile on his  
6 face.

7 They literally have an excuse on how they have  
8 to explain and have this Court ignore all the written  
9 record. That's what they're doing every time, just  
10 trying to confuse things and say that document, yeah,  
11 you know, yes, he signed that document but, you know,  
12 he only allowed because that was Bill Markham being  
13 unreasonable.

14 You know, out in LA, as you recall, Mr. Klamer  
15 had no problem saying, yeah, I wrote that letter to  
16 Milton Bradley on August 19th; yeah, I knew it wasn't  
17 true; I just said it. So he's either a compulsive  
18 liar, or is he lying then, or is he lying now? I mean  
19 it's the classic problem.

20 And, you know, the 1989 deposition testimony.  
21 In that deposition testimony Mr. Krumholz said, yes,  
22 they did mention Leonard and Grace and said that's one  
23 of the reasons why he went to Bill Markham. Well, the  
24 relationship with Ruben Klamer and Bill Markham spanned  
25 decades before that. Leonard and Grace showed up in

1       the late fifties; that's one point. But the second  
2       point is in that very same deposition repeatedly under  
3       oath, said Bill Markham reduced my ideas down to  
4       concrete form. Bill Markham. And the same deposition  
5       of which he allegedly -- you know, he did say Leonard's  
6       and Grace's name. He did, he said it. But when he  
7       said who created it, Bill Markham.

8           That's exactly the problem. Every step of the  
9       way they have to come up with an excuse. This is why  
10      what is said in this document isn't right. It's more  
11      this story that we just told you; yeah, sorry Bill  
12      Markham is not here. I mean it's the same song and  
13      dance at every turn. They have to explain it away.

14           I mean Mr. Krumholz just told you that the  
15      license or the agreements or -- sorry -- the  
16      registrations in this case that list Milton Bradley as  
17      owners come from the license. How is that possible? I  
18      mean that's not possible. They're not right. And they  
19      took it on because Bill Markham was cut out of the  
20      conversation. And we've laid that out in our brief, so  
21      I don't really want to keep going there.

22           And just to be clear, I don't know if we put it  
23      in our papers, but I think Ruben Klamer continued the  
24      distance once Bill Markham died. I think we did put it  
25      in our papers. He sent a letter within days of Bill

1       Markham's death to Lorraine Markham saying do not under  
2       any circumstances contact Milton Bradley. And he was  
3       doing that because he wanted his face on the box. He  
4       wanted to elevate his -- whether it's to minimize  
5       Markham or elevate him, it's some combination. And  
6       what happened in '65 wouldn't have happened if Bill  
7       Markham was here today. So that's the common theme and  
8       that's what we keep hearing.

9           And while we're talking about the time frames,  
10      the invoices, they don't match up. The invoice was  
11      sent on October 20th. The prototype, as we know, was  
12      created -- completed and sent to the attorney by  
13      August 14th, so it's literally speculation about when  
14      they were working on it and what they were doing. And  
15      I'm not going to read the testimony into the record,  
16      but I'll identify it. At the trial Leonard and Grace,  
17      or actually I'm not sure if this was Leonard or Grace,  
18      quite frankly, but I know the substance of the  
19      testimony was they spent their time playing the Game.  
20      So you want to talk about six weeks? That's a  
21      significant amount of time was playing the Game and  
22      seeing if there were any issues, and that testimony is  
23      104 line 24 to 105-5.

24           Just a couple of other issues I'll just knock  
25      out real quickly. This CPD business, it was a d/b/a.

1       There is no corporate entity. It was Bill Markham,  
2       Bill Markham alone. There is no corporate, I mean it's  
3       a nonissue.

4                  THE COURT: He represented himself as a  
5       corporate entity; right?

6                  MR. POLLARO: As a d/b/a corp. He had always  
7       had a d/b/a, which --

8                  THE COURT: Okay.

9                  MR. POLLARO: -- my understanding is it has no  
10      legal effect whatsoever and that's --

11                 THE COURT: So I'm not sure I'm following what  
12      the point of this is, so what's the point?

13                 MR. POLLARO: The point is they keep trying to  
14      obfuscate things by saying somehow it's CPD or Markham;  
15      we don't know.

16                 It's Bill Markham. There was no company; there  
17      was no entity. It was Bill Markham, the individual who  
18      was running this enterprise.

19                 THE COURT: Well, whatever his corporate form,  
20      he had a company. You don't dispute -- he had a  
21      company and had two people, at least, working for him;  
22      right? And he also had his wife working for him. That  
23      seems undisputed, doesn't it?

24                 MR. POLLARO: Correct. I mentioned it because  
25      they keep throwing it out there like it's somehow

1 relevant, so --.

2 THE COURT: Okay. Anything else?

3 MR. POLLARO: One moment, your Honor.

4 Yes, another; I think this is a quick one. It's  
5 the best evidence rule. I'm not even sure I even still  
6 understand it because Defendants have, certainly Hasbro  
7 has admitted that they went to the copyright office and  
8 couldn't get the works, and somehow we should be  
9 faulted for -- they say we didn't do it, but looking at  
10 Tab 36, I won't bother to bring it to your attention,  
11 but we actually told them in an RFA that, yes, in fact,  
12 we did go try and get it. So I'm not sure why we're  
13 still talking about that issue.

14 But going back to the authorship issue, I think,  
15 following up on conversations from last time,  
16 Mr. Krumholz has mentioned that we need to take -- or  
17 actually I think this happened out in LA -- a  
18 disciplined approach to determine authorship; and  
19 that's exactly right. And so the story you've seen has  
20 too many holes in it and so this discipline approach is  
21 everybody said Bill Markham created it. All the  
22 documents are consistent with that. The only thing  
23 that's not, that's the testimony we heard about in LA,  
24 and that's it.

25 I do want to talk about the CCNV case real

1 quick. The rationale is very simple. Although that  
2 case dealt with the post '76 Act, they were  
3 interpreting the term "employee" -- not "employer" like  
4 the instance and expense test -- "employee," and the  
5 Supreme Court said very clearly if there's no  
6 definition in the statute you use common agency  
7 principles; you don't come up with a test, you don't  
8 come up with a rule; you just do what you've always  
9 done. And that's why the commentators picked up on it  
10 and that's why employer, the same exact rationale,  
11 employees under the 1909 Act. And so, quite frankly,  
12 this discussion between circuits, districts or  
13 whatever, the Supreme Court came down on that, so  
14 that's the law, and whether other jurisdictions don't  
15 want to follow it, that's their prerogative, I guess.

16 And just one quick other point is this idea that  
17 I've heard it said several times that somehow Markham  
18 could have deposited the prototype. We've been very  
19 clear with our positions. First of all, in the  
20 categories that these copyright registrations are  
21 formed, you simply can't do that. It doesn't fit into  
22 that small exception. So we put that in our papers, so  
23 suffice to say I'm not going to spend any more time on  
24 it; but it's just not correct. There are limited  
25 situations where you can do that. That's not in the

1 registrations we're talking about, that doesn't matter,  
2 so it's publication or nothing. And by the time Milton  
3 Bradley --

4 THE COURT: Wait. I'm not sure I understand  
5 what you're saying. You're saying that you could not  
6 deposit the work with the copyright office?

7 MR. POLLARO: Could not. You couldn't -- no,  
8 you couldn't, because you wouldn't be able to get a  
9 registration.

10 THE COURT: And why was that?

11 MR. POLLARO: Because in going back to what I  
12 said this morning, the general rule -- and I don't even  
13 want to call it the general rule. The rule is you have  
14 to publish the work and then you deposit what you  
15 published in the copyright office. That's the rule.  
16 There was a very limited exception that applies to  
17 things that don't fit that bill, performances, things  
18 like that. It doesn't apply to things that are  
19 publishable. And so the Defendants keep making the  
20 arguments we could have or should have done something  
21 else. That's simply not the case. And I'll spare you  
22 me pulling out the copyright compendium, but I can  
23 assure you that it's cited in our brief and it tells  
24 you exactly that. You can't do that in the categories,  
25 specifically in the categories that these registrations

1 are.

2           And then secondly on that point, while we're  
3 talking about it, again, they seem to fault us for  
4 being cut out of the conversation. You know, they cut  
5 us out. I mean I've told you about the lie, I've told  
6 you about we have the oral lie, in writing, we talked  
7 about that with Mr. Klamer and it's in our briefs; but  
8 that's perpetuated at every step of the road, and so  
9 somehow for them to turn around and disingenuously say  
10 we should be faulted because we weren't part of the  
11 conversation on the copyrights, that's a problem of  
12 their own creation.

13           I mean Bill Markham was doing everything he  
14 should have been doing. These guys behind his back  
15 were divvying up his rights. That's what happened.  
16 That's what happened. I mean Bill Markham testified  
17 very clearly, and they have not responded to it once,  
18 you never heard it from them.

19           He put a clause, Bill Markham put a clause into  
20 this agreement that said if Link didn't perform the  
21 whole game comes back. That's it. The whole game, the  
22 whole -- all of the rights. That's the way Bill  
23 Markham operated, and that's the way that some of the  
24 later agreements operated. Some did; they had some  
25 tweaks. But that's what he said. He testified about

1       it in his 1989 deposition very clearly. I put that in  
2 there so if these guys didn't hold up to their end of  
3 the bargain, I would get the game back. And that is a  
4 reservation of rights, explain and simple, and that's  
5 what the parties understood when they signed that  
6 agreement.

7             THE COURT: Okay. Thanks very much.

8             MR. KRUMHOLZ: Could I take two minutes to  
9 clarify a couple of things on the record.

10            THE COURT: Okay. Make it quick.

11            MR. POLLARO: Thank you, your Honor.

12            THE COURT: Thank you.

13            (Pause)

14            MR. KRUMHOLZ: I feel like this is the second  
15 deposition transcript I've dropped. So I just want to  
16 clarify, your Honor, JTX 3, 4, and 5 are the  
17 applications. On the back page of each application it  
18 says two copies received December 19, 1960. Our  
19 conclusions of law 13 explains that you can in fact  
20 submit the deposit copies to get statutory protection.  
21 They did, at least on the face of the registration, so  
22 I'm not sure what he's talking about.

23            The other thing is just for the Court's benefit,  
24 in terms of the evidence on the payment of cost, you  
25 had referenced this. There was a prior agreement,

1 HTX114, between them where it says explicitly that  
2 Mr. Klamer would pay the cost. JTX15 is a virtually  
3 contemporaneous agreement dealing with different  
4 products and different projects where they said they  
5 would pay the cost. And PTX283 is a document almost a  
6 year later between them where for the first time they  
7 decided to share the cost and they explicitly accepted  
8 The Game of Life from that modified agreement.

9 And also the second day of testimony on page 49,  
10 lines 22 through 24:

11 "Question: Did you owe Markham for his costs  
12 whether you did a deal with Milton Bradley or not?

13 "Answer: Yes, I did."

14 THE COURT: Okay. Very good.

15 All right. Thank you. I'm going to get to work  
16 on getting an opinion here together. It will probably  
17 be hopefully not too long, but at least I would say a  
18 couple of months before I get you an opinion; but I'm  
19 very confident you'll have it no later than August.

20 All right. We'll be in recess.

21 (Adjourned)
